Hi, Recently i noticed when ever i try to reply or make a new thread about something, i cant see any emoticons and thread editing formats anymore.

All i see is this

Is this a Bug or it happening for all?

Nope works fine for me, try logging out and logging back in.

If that doesn't work clear your cache.

I'm using google chrome right now and it's working just fine.

Try another browser.

It may be a extension/plugin you have downloaded for chrome. Do you have any installed?

Flush your DNS then clear your cache again. Alternatively you can use Google's DNS servers and then do what I said. They are very reliable.

I would say it it was chrome but here are my Plugins

Wow....It finnally working now...

Thanks for everyone Concern and Support
