Thread: [\[TUTORIAL\] How to use Data Protector V2 FUD Crypter with Predator Pain Logger V11+](#)

jameess242 - August 24, 2013, 8:29 am

Hey all,

So myself and I am sure many others have had compatibility issues with DPV2 and PPLV11 files being crypted...So I thought I'd make a quick and simple tutorial on how to crypt your file while it is compatible with the crypter...

1. Make your logger

This is simple, do your logger how you would usually do it, though to ensure the highest compatibility and undetectability, use my settings:

This has the lowest detection rate and least suspicion to AV's. Disabling Stealer Logs is EVEN LESS suspicious and could possibly stay FUD for a while, though they are the main reason why I use the tool so I leave it on.

2. Crypt your file - Step 1

Step 1 is to put your file into Data Protector V2, and make sure it is injecting/executing as ITSELF... not AppLaunch or vbc...these will not work and make your file crash!!

3. Crypt your file - Step 2

Next is to adjust the settings. Melt, Add to startup and fake error SHOULD NOT be enabled...why? Melt - You already have this enabled on your crypter, doing it again can prolong runtime and also crash your logger. It is not recommended to melt twice

Add to startup - Double startup registry's can confuse your logger and cause a crash

Fake error - Two fake errors will look extremely suspicious on the user end!! Though if that's what your into, go for it. This may also crash your file, I've never tested it.

Again, For lowest detection rates, you do not need to bind files, create downloaders or change creation dates...therefor I crossed these out. If you want to, you are more than welcome to try these options out, though I do not recommend it unless you absolutely have to.

I used Pump File, just to make it look a little more legit in size.

4. Scanning your file - Step 3

number one rule, NEVER use an external scanner...ALWAYS use the one from Data Protector, the one that is internal! If you scan on sites like virus total, your file will be 10/46 in no time, and it'll definitely hurt the crypter.

Now, choose your file and scan to see if it is FUD!

5. As you can see, my file is FUD!

6. Upload your file - Step 4

Now it's the easy part...uploading! Find a good host like zippyshare.com.

This is where you can upload your files!

7. Enjoy!

Start spreading and infecting your victims with a FUD logger by Data Protector V2 and Predator Pain V11!

Thanks for reading! Feedback is appreciated :D

NOTE: This guide is only to be shared on FlowForums and HackForums...any other distribution is LEAKED!

Xyzo - August 24, 2013, 10:18 am

Great tutorial, but as you might not know, ge.tt DOES distribute.

The World WarZ - August 24, 2013, 10:30 am

how are you?

i don't have that but Great HQ tutorial!

kastiel - August 24, 2013, 10:38 am

lol. you are banned from dataprotector.

and yeah ge.tt does distribute, get your facts right.

jamesss242 - August 24, 2013, 10:48 am

(Aug 24, 2013 10:38 AM)kastiel Wrote: [\[CITE\]](#) lol. you are banned from dataprotector.

lol i know why your -9 rep

cos you flame every thread

chillax ya flaps man, got rid of ge.tt

it even says on data protector to use ge.tt under the API section so gtfo.

King Xerxes - August 25, 2013, 3:40 am

Thanks for the tutorial man, good quality and great!!!

jamesss242 - August 25, 2013, 4:28 am

Your welcome and thanks for the feedback, glad you enjoyed it!

King Xerxes - August 25, 2013, 4:33 am

No problems, but dude why flaming your own thread? o.0

jamesss242 - September 1, 2013, 11:52 pm

(Aug 25, 2013 04:33 AM)King Xerxes Wrote: [\[CITE\]](#) No problems, but dude why flaming your own thread? o.0

sorry for the late reply, was banned and repfucked lol

what do you mean?

jamesss242 - September 4, 2013, 6:50 am

putting this up for future reference :)

jamesss242 - October 10, 2013, 2:55 am

keeping this up as DP is getting un-fud very quick due to idiots uploading on VT

jamesss242 - October 12, 2013, 7:15 pm

Putting this up once again! Hope anyone who needs it reads it ;)

partzo - October 12, 2013, 7:37 pm

well thanks for sharing this. I couldn't figure out how to use this lol.

jamesss242 - October 30, 2013, 2:04 pm

Putting this up to keep Data Protector FUD!!

SiraBots - October 30, 2013, 2:24 pm

Great product, very-well done on the tutorial. Good job!

legend_x - October 30, 2013, 4:23 pm

Thanx mate. PPL sales forum is closed. How can I get both the logger and the crypter u used?

jamesss242 - October 30, 2013, 5:51 pm

(Oct 30, 2013 04:23 PM)legend_x Wrote: [\[CITE\]](#) Thanx mate. PPL sales forum is closed. How can I get both the logger and the crypter u used?

First get your preferred virus tool then Go to the cryptography board and get data protector a

jamesss242 - November 6, 2013, 11:35 pm

Keeping Data Protector up and alive :)

duke12457 - November 10, 2013, 2:37 pm

download link for predator v 11? Were is it im new and i really dont know much about forum.

jamesss242 - November 11, 2013, 1:34 am

There's no download link...It is a product sold on HF.

RealHackingurwifi - November 11, 2013, 3:57 am

Great Tut for new members, who don't know much about setting up keyloggers with crypters. Goodjob

CryptorMods - November 11, 2013, 5:53 am

Looks really good. Mind sending a DL link?

jamesss242 - November 11, 2013, 1:04 pm

(Nov 11, 2013 06:53 AM)CryptorMods Wrote: [\[CITE\]](#) Looks really good. Mind sending a DL link?

Both of these are products by HF members, not freeware...if you want them go and buy them.

skozyy - December 9, 2013, 10:32 am

Nice tut man, keep it going.love it

shagi25 - December 9, 2013, 12:44 pm

Very nice TuT m8, this will sure help those who need it. :) great work

warlock994007 - December 9, 2013, 12:51 pm

Wow Cool GUI man, good thinking may I know which language you programmed this.?

ZombieWolf - December 15, 2013, 6:14 pm

great tutorial. Really nice quality and very helpful for future references.

legend_x - December 16, 2013, 4:25 pm

Nice 1. I have been using this and I can vouch 100% for it. Nice one

MaYa666 - January 29, 2014, 8:03 am

How we must use downloader and binder on the predator or on the dataprotector? i want to use binded program and icon also!

jamesss242 - February 18, 2014, 7:36 pm

Bind on DataProtector, Not predator. It is better to do all binding and all crypt work on DP and all keylogging features and such on Predator.

jackieo500 - February 19, 2014, 2:15 am

Thanks heaps for this.... No i might be able to get FUD files haha >:)

jamesss242 - February 19, 2014, 2:55 am

Glad I could help you out jackieo500

mafiaanonymous - February 19, 2014, 5:26 am

Wow Good Nice FUD Crypter working Thank you pm plasse :D

sahtecan2 - February 19, 2014, 6:29 am

Can someone tell me another cryptor please?

jamesss242 - February 19, 2014, 12:28 pm

(Feb 19, 2014 07:29 AM)sahtecan2 Wrote: [\[CITE\]](#) Can someone tell me another cryptor please? CryptMe is an alternative option (if still available) though Data Protector is one of the best Other options can be found in the marketplace or in the cryptography section :)

Lubus - February 23, 2014, 9:26 am

Thanks man very informative tutorial.

jamesss242 - February 23, 2014, 1:05 pm

(Feb 23, 2014 10:26 AM)Lubus Wrote: [\[CITE\]](#) Thanks man very informative tutorial. You're welcome, glad I could be of assistance to you :)

Private666 - February 23, 2014, 4:34 pm

Very nice and detailed tutorial bro.

Black Light - February 23, 2014, 6:42 pm

Great Tutorial Mate I appreciate for doing this im going to try it out right now

jamesss242 - February 23, 2014, 9:10 pm

Glad you both like the tutorial. Best of luck with Predator and DP!

sambo232323 - February 24, 2014, 4:55 am

what a great tutorial, really helps out a lot

ivrydavid73 - April 23, 2014, 8:48 pm

Great Tutorial! This will help me alot. Thanks.

MrTing - April 23, 2014, 9:05 pm

I'm surprised people need a tutorial to use a crypter. Either way, good show, good gravedig.

tftoolz - April 27, 2014, 12:52 pm

Nice tutorial man fully detailed with good screenshots

onyeoga - August 22, 2014, 5:35 pm

pls can u show us how to use data protector to crypt predator 14

goodluck2014 - October 9, 2014, 5:55 pm

Hello, i'm buying predator pain V14

But does anyone know any good FUD crypter thats 100% working with predator pain V14

please name crypter and hf link

riddickval - November 14, 2014, 8:30 pm

nice tutorial... but why didnt you check injection persistence..??????

mrRichard00721 - July 4, 2015, 8:23 am

WOW thanks for this man, it really useful. Bless

Nikolay - July 4, 2015, 3:55 pm

Thank you really helpful information lol thanks again everyone

KnockSteadys - August 19, 2015, 10:37 pm

nice man this really helps a lot man thanks

actelcxa - October 26, 2015, 11:35 pm

i want to buy data protector

Angel5151 - November 30, 2015, 11:00 am

Thank you dude , helpful information . I looking for more Topic's about Crypting hope to find here what i looking for .

jkavdaju - November 30, 2015, 8:48 pm

Your welcome and thanks for the feedback, glad you enjoyed it!

neosmart661 - August 25, 2016, 11:53 pm

please how can i buy data protector

mackavelli - September 11, 2016, 8:04 am

is predator pain stil working at all anyway.. nice

Kpajie - October 4, 2016, 11:28 am

Where can I get predator?
