Thread: [Buying Shells, Shell Tester & Shell Method](#)

2344lkn - August 24, 2013, 3:53 pm

Looking to buy a few shells nothing crazy.

Looking to buy a Shell Tester.

Open source cannot be in VB6 or .NET any other language is fine and must be updated with the current shells I'm not looking for the old one that only does red/green shells.

Also looking to buy a method to obtain shells.

The method cannot have to do with webdav.

It also cannot be a method like "search for admin logins and enter crap like 1'or'1'='1 and upload a shell"

My disclaimer:

I can pay through anything that accepts a VISA and does not require a registration.

I know the shells will die out in a day so don't worry I won't get mad.

The shell tester needs to be open source so I can make my own adjustments and cannot be in VB6 or .NET.

The shell method I don't mind paying a little bit of money for a method but dont come here saying \$100 USD with a whack method if the method is known or you know other people using it chances are I already know about it.

I would also like to know a little bit about the method before a payment is given for example: the method is using a RDP Connection bypass exploit etc etc. and again please no webdav methods that shit has been played out since 2006 hardcore I can't believe people still even get shells using it.

I'm also not looking to start a booter or stresser this is all for personal use only.

Thanks and post ur price and what u got :)
