You will probably notice a cut when I received the email. It's because it took 3 minutes to receive it and I didn't want to make you lose 3 minutes of your time.

Method still works... if you wanted to know

P???ce - September 3, 2013, 11:14 am

That's really great :D Simple but Worth!

Vouch for you for this Video Dear.

Thanks for the tutorial, mate helped me out.

ghost0001 - September 7, 2013, 12:43 pm

So I guess this only works for forums right? or only if you can get them to send you an email via their website

Awesome tutorial man, helped alot!

???

Obs3rv3r - September 11, 2013, 11:33 am

Interesting method. Thank you for sharing it with us :)

ghost0001 - September 15, 2013, 9:37 pm

Hasn't worked yet, but pretty clever, usually forums send their emails via a different server... also I tried it on one and it was a godaddy server and every email sent has a different ip.

DeadCode - September 17, 2013, 7:26 pm

Yeah, as stated, it doesn't always work

lfinger - *September 17, 2013, 8:19 pm*

Thanks for this! I got the IP to a well protected website.
