FREE GAMES!

Always wanted that one game, but didn't have the money for it? No worries, this method is 100% free but there are some requirements.

This method isn't Social Engineering, it's just a bug with the site that I'm teaching you guys how to abuse for educational purposes of course.

RequirementsInternet

6\$ + prepaid card (Nothing gets taken out of that card.)

An email

An address

The Method

Buying the card

First of all, go buy a prepaid card around 6\$ + just to be safe, I normally put like 20\$ on it, buy something and sell it for like 20\$ because people like to buy VCCs for a certain amount of money on it. So I guess not only do you get a game you profit to!

Signing up

This probably sounds bullshit to you, but I got Blackops II from this and I still use it today, I got it on release! The website is "Gamefly.com" big site, probably has some big bugs..(; Pretty much look for a game you want, any game that's already out unless you want to wait until the game you want is out, Click the game you want! Then it says;

Buy

Rent

Free trial

You probably know what you're going to click, it's going to be "Free trial" it's a 30 day free trial, put all your information in, legit email and address. You can use a fake name if you want but that would be fraud and I don't recommend that. (Black hat activity isn't allowed to be used or talked about on HF so don't use do that if you want.) After you add all of your information you're 90% done! WOO! and it'll take 2 days to deliver your game. (Doesn't come with a case, make your own or something grab a junk game or something and use the case.)

The Delivery

After the game is delivered just go to your account and close the account and that it, that's your

game to keep. Gamefly won't mail you any bullshit or anything so don't worry I've gotten nothing on Black ops II or any other games I got. No money will be taken out of your card because the prepaid company will deny it. :3 Even if they take money the game costs 6\$ not a big deal.

Note: It's a game per address since GameFly has updated their prices. (It's lower now which is good it used to be 15\$, now it's 5\$.) Use your friends wisely, and or your neighbors. I would also like to add that this isn't my method, I just wrote the guide I didn't create the method. It's public this is just for people who haven't seen it so please do not hate

Interesting yet I'd be too afraid that after doing this a few times, Gamefly and the law would be watching me.

They won't get law involved for 60\$ also it's a game per house, I can also make a unblacklist guide to.

If you're scared use a drop house so it's risk free.

You have to live in the US

I would try it but I live in Canada. I'd recommend to try it, even if you loose 6\$ its no biggie.

Anyway, nice find op. ?
