Thread: [Need Help for spyeye botnet and andromeda](#)

maskhush - August 27, 2013, 1:44 am

I just setup andromeda and spyeye botnets with cpanel
i created andromeda bot with builder it work for only at my pc but when i upload it to tinyupload and
send link to another computer it does not work
And for spyeye i build bot with builder but it not work

Brian Krebs - August 27, 2013, 1:53 am

Both of these (spyeye is banned here so refer to it as SPE) are highly detected by anti virus.

Meechy Darko - August 27, 2013, 2:00 am

And talk or discussion about Spy-Eye, or ZeuS is completely prohibited on this forum.

Don't get yourself banned.

Ariana Grande - August 27, 2013, 9:53 am

[Here](#) is my tutorial on Andromeda. SpyEye is both outdated, and prohibited from discussion on these forums.
