Thread: [Mirdude`s 1st Ever Cinema 4D Render Guide \[VIDEO\]](#)

Turnover - August 27, 2013, 9:00 am

This guide shows you how to render text on Cinema 4D which you can put onto photoshop, it is a detailed guide.

More videos to come including a package with 100s of fonts, effects, cinema 4D renders and models.

Please rate/comment and subscribe on YouTube and feel free to comment below, sorry about low quality, I purchased Camtasia online, so I have the recorder and editor which I can use, instead of Hypercam. I made the video ages ago, but put it on a few days ago because I added some 50 cent music and edited it a bit.

Enjoy- <http://www.youtube.com/watch?v=w7xmoGdywII>

Thanks for watching.
