I have a 100\$ BTC for about 100\$ PayPal if you're interested. (I just want you to cover the BTC fees, so like 98\$ for a 100\$ paypal or w/e)

If interested send me a DM or convo, thanks.

Just out of curiosity why not use any of the currently existing PayPal to crypto exchanges that are in the currency exchange section. And I might be able to help you with this depending on the rate you're looking for.
