Birthrate's 1 Year Premium Web Hosting(Yahoo Small Business) and Domain Contest

I am delighted to be announcing this years worth of premium web hosting for a small business(Sponsored by Yahoo) which includes a domain (.com,.net,.org,.biz,.info,.us) contest I am doing, users will be able to participate with requirements which are listed below.

If you want a free paid 1 year web hosting with a domain of your choice. Enter now before it's too late! Entries must be in by the 4th September.

Requirements

You must have at least 300 posts and more than +30 reputation.

Form to reply with

Quote:When did you register on HackForums:

What was your main goal/want when signing up:

What brought you here to HF:

What have you achieved since joining:

What do you plan on using your web hosting for:

Why do you want to win:

Contact details(for if you win, to contact via):

How It'll work

The winner will be generated via random.org, and users who enter correctly with the given form, will be entered.

The winner as stated will win 1 years Yahoo Small Business Web hosting with a domain.

More information on the web hosting [here](#), It's an okay web host to me. :)

Good luck to all ? ?

Skillful - August 29, 2013, 10:58 am

When did you register on HackForums: I don't remember. Around 2 years back maybe.

What was your main goal/want when signing up: I didn't actually have a 'goal' in mind. I signed up because I liked this forum very much :)

What brought you here to HF: I'm a coder. I was searching for some tutorials related to JAVA and one of the google searches brought me here.

What have you achieved since joining: Respect of some members. I've hardly been neg repped. I might not be well known but some members here do know me as a nice and friendly, helpful member.

Why do you want to win: I'm looking to kick-off my log related to Windows Phone. Its a really nice niche to get into. I'm not trying to monetize it but just writing it because I have always wanted to

have a blog of my own. I also do have a Windows Phone so it would be really convenient for me to do write-ups/tutorials/videos on Windows Phone.

Contact details(for if you win, to contact via): PM would do :)
