Thread: [Business template for you \[FREE\]](#)

theAbsolute - August 29, 2013, 12:01 pm

Hi, this is another template from me I decided to share with you.

Template was for one of my clients, but we decided to change the template, so this one has never been used.

- only index page included
- it's lightweight
- html5
- half responsive (I meant to do it full responsive but when I gave up finishing the template for already said reasons I didn't made everything responsive)

I can customize it to fit your needs if you want, but I am really stuck with job and don't have much time, so don't know if I will get to do it for you soon.

If you want to use the template, you don't have to put my copyrights.

Cheers, here is the preview of full page:

Send me this one also man? I'll have a go at making some other changes so its fully responsive and possibly alter the design a little and send it back to you.

No problems, I'll send it.

That sounds good also, then we can sell it!

kidding...sending right now :)

Just woke up, sorry for late answer. I have just added download link in first post. Enjoy your template and good luck with your website.

Cheers.
