Thread: [Contact form for you HTML+PHP](#)

theAbsolute - August 29, 2013, 2:25 pm

So, I decided to share some thing with you, and I am continuing.

You can probably find better script if you google, but if you are looking for light working contact form, this is for you.

PHP Code

```
<?php
```

PHP Code:

```
<?php
```

```
if($_POST["email"]<>") {
    $ToEmail = 'your@email.com'; //Put your email here
    $EmailSubject = 'CONTACT'; // Title of email
    $mailheader = "From: ".$_POST["email"]."\r\n";
    $mailheader .= "Reply-To: ".$_POST["email"]."\r\n";
    $mailheader .= "Content-type: text/html; charset=iso-8859-1\r\n";
    $MESSAGE_BODY = "<b>Name</b>: ".$_POST["name"]."". "<br>"; //name
    $MESSAGE_BODY .= "<b>Email address:</b> ".$_POST["email"]."". "<br>"; //from
    $MESSAGE_BODY .= "<b>Question:</b> ".nl2br($_POST["comment"])."". "<br>"; //text
    mail($ToEmail, $EmailSubject, $MESSAGE_BODY, $mailheader) or die ("Failure");
?>
Message sent. <!--Message which is printed if the email has been sent. You can change it or delete it-->
<?php
} else {
?>
<form action="" method="post">
<table width="400" border="0" cellspacing="2" cellpadding="0">
<tr>
<td width="29%" class="bodytext">Name:</td>
<td width="71%"><input name="name" type="text" id="name" size="32"></td>
</tr>
<tr>
<td class="bodytext">Email address:</td>
<td><input name="email" type="text" id="email" size="32"></td>
</tr>
<tr>
<td class="bodytext">Question:</td>
<td><textarea name="comment" cols="45" rows="6" id="comment" class="bodytext"></textarea></td>
</tr>
<tr>
<td class="bodytext"> </td>
<td align="left" valign="top"><input type="submit" name="Submit" value="Send"></td>
</tr>
</table>
```

```
</form>
<?php
};
?>
```
