Thread: [\[TuT\] Getting saved passwords and usernames From computers with a usb. Ex.Facebook](#)

spiritofghosts - August 29, 2013, 3:20 pm

How to get saved passwords from computers using a usb

you will need these programs

<http://www.nirsoft.net/utis/passwordfox.html>

<http://www.nirsoft.net/utis/chromepass.html>

<http://www.nirsoft.net/utis/mypass.html>

http://www.nirsoft.net/utis/web_browser_password.html

http://www.nirsoft.net/utis/internet_explorer_password.html

Step 1. Create a notepad file on your usb

Step 2. Rename the files so they don't look suspicious

Step 3. [I usually go to the library to do this, i find someone on facebook and say can i check something real quick.] Get a computer you know has passwords on it.

Step 4. Open your usb and highlight all of the files.

Step 5. Right click them and hit open.

Step 6. take out the flash drive.

The passwords should now be in a few notepad files that you can easily look at.

Enjoy

Update, if your smart you can use a bat file to open these

hatrick - August 29, 2013, 11:07 pm

Hey this is a old method But you made a nice tut with all the up links and Nice steps.

133720 - August 29, 2013, 11:48 pm

Why don't you use usb thief?

or use manual . search in firefox Tool-> option -> Security -> save password.

Rackzen - August 30, 2013, 4:04 am

You can also make a usb keylogger :)

spiritofghosts - August 30, 2013, 5:54 pm

The reason for this is so you can plug it in and use the programs with people knowing what your doing

Ombra - August 31, 2013, 1:33 am

I saw this tut so many times that it's almost boring :/

Thank you anyway for trying to be useful.. take an apple

Spoiler ([Click to View](#))

Joking.. no apple :c

ThePanda - August 31, 2013, 7:59 am

Hey, good job ! nice tut !!

i like what you do :)

spiritofghosts - August 31, 2013, 7:27 pm

Thanks panda. method should work until browser companies fix security.

Dumbo_ - September 1, 2013, 7:49 am

Looks cool, but isn't there a risk that all data on the usb will get removed if you just remove it as soon as you are done? xd

spiritofghosts - September 1, 2013, 12:16 pm

i guess yuo could use a rat instead, but i use tis for library computers and if i get a rat on there everything is deleted once you log out.

ramonhackpro - September 1, 2013, 12:22 pm

hmm.. old but still very helpfull

sweetleaff - September 1, 2013, 10:27 pm

Do you know if there is a usb rat tut somewhere on here?

spiritofghosts - September 2, 2013, 8:35 am

Its old but its works legitimately.

.

Blax - September 2, 2013, 8:39 am

You know, keyloggers would be easier.

spiritofghosts - September 2, 2013, 8:45 am

on library comeputers, once you log out, all the info and programs are dleted, therfore a keylogger would be useless

gizmoguy - September 2, 2013, 8:47 am

Joking.. no apple :c

aww you just broke his heart man </3 theres better methods for this especially if you have the u3 flashdrives good share tho im sure someone will use this :P

spiritofghosts - September 2, 2013, 11:25 am

lol, people still use the method due to ease, but there are other ways , .

taylor333 - September 2, 2013, 11:39 am

Awesome tutorial, its kinda old tho tbh - besides its easier to just make a USB Rat :/

spiritofghosts - September 2, 2013, 5:43 pm

I think most of us know we could indeed use a rat, i was just making a tutorial
