Was worth my money. Might as well review this although there isn't much to review.

Safety ????

Even though this user has a few red's, I decided to go first.

Trusted him 80% with my money and I was glad to receive my product.

Gained my trust.

Delivery ?????

Instantly. As soon as he received the money I noticed that my views had already started.

Overall ?????

I highly recommend this product if you're starting up GB or just boosting your views.

Thanks again WorldLeader :)

Its not a bot pal, there's another way to do it. Do NOT use jingling, it has a binded trojan, i recommend deleting its asap.

Message me if you need views mate.

Fragger - September 9, 2013, 11:24 am

Well I think I made it clear not to resell the method to anyone, not only did you resell it but you copied the exact same thing I sent you. Avoid this user very sketchy.

I completely admit to what I did, I apologise and it won't happen again Fragger.

Well tbh the method is public, and you cant claim it to be yours. I knew about this method before anyone. I might aswell release it because people are just being cheap and trying to make money of something that's public.
