Thread: [Hacking email \(hotmail or windowlive or gmail\) \)](#)

xristina13 - September 1, 2013, 5:19 pm

Hello everyone im new here and i have a question can somebody tell me if its possible if i know someone email can i hack him and get his password? Thanks

legendrock7 - September 1, 2013, 5:50 pm

I believe bruteforcing would do the job?

xristina13 - September 1, 2013, 5:55 pm

i dont think so because bruteforce is a list of english codes i need something for greek language

I'm sure there must be Greek dictionary lists somewhere online no?

Cletus Kasady - September 1, 2013, 5:59 pm

BruteForcing is your best option, just find a list of Greek words then sit back and pray one of them is right...

xristina13 - September 1, 2013, 6:00 pm

lets leave bruteforce in the corner is there anything else?

Social engineer his email provider

Man in the middle attack

The list goes on...

xristina13 - September 1, 2013, 6:14 pm

im using darkcomet but i cant make him my slave i want something that i can hack his email right away from my home.

6Silent6Knight6 - October 25, 2013, 3:42 pm

thanx for the help guys! been looking for some gmail hacking info for a while.

we r num 1 - October 25, 2013, 3:43 pm

Maybe have him download a keylogger and have it crypted? Theres many different ways going about hacking emails.

The Commander - October 25, 2013, 3:44 pm

Bruteforce it but get a Greek password list instead of English?

Aura - *October 25, 2013, 3:44 pm*

Guys, this thread is 2 months old, there's no need to reply to it anymore.
