Thats boss! I love the pose, especially that eerie blue glow. I've never seen this anime character. Whats the anime called?

Obli - September 2, 2013, 11:29 am

It is not an anime. This is a VOCALOID character. Basically, it is a singing synthesizer developed by Crypton.

Why thank you very much !

Anybody has anything else to say ?

Since your signature is on a light scale I would make her render darker with a low contrast and see how that looks.

I'll do that when I can, a little too busy right now, but thanks !

Anybody else ?
