Thread: [\[RAT\] Slaves are not connecting after restart](#)

Natel - September 2, 2013, 6:28 pm

so im having this problem with blackshades. i tried to transfer my slaves from Xtremmerat 3.5 they did connect but when i restart my client or they restart their computer they are not connecting back. all im getting is this

```
Communication socket activated N/A Port: 81 02:25:54
Transfer socket activated N/A Port: 82 02:25:54
Connection attempt 117.221.43.157 Communication socket 02:25:55
Connection attempt 36.81.105.246 Communication socket 02:26:01
Connection attempt 93.171.70.112 Communication socket 02:26:03
Disconnection 36.81.105.246 Remote socket closed 02:26:51
Disconnection 117.221.43.157 Remote socket closed 02:26:52
Connection attempt 36.81.105.246 Communication socket 02:26:56
Disconnection 36.81.105.246 Remote socket closed 02:26:56
Connection attempt 117.221.43.157 Communication socket 02:27:19
```

any help?

yeah and i also infected my self to make sure. first when i infected my self i did get connected instantly. however, after restarting my computer i did not get connected. in statics section it says connection attempt and my ip is there but no connection.
