Thread: [The truth and disasspointment about the Bytecrypter By Mark](#)

Que - September 3, 2013, 10:27 am

Well i ve bought this product for about 2-3 years and was pretty glad with it till today. I just can say that i am pretty disappointed cause of a raging Mark ! who start flaming on customers without a given reason.

You guys should know what can happen to your "LIFETIME License" when things may not work in their ""team"". I just asked him to send me the crypter due to some vmware crash and provided him the serial which was given to me directly from him. Proof:

[\[IMG\]http://img707.imageshack.us/img707/8192/xzyj.png\[/IMG\]](http://img707.imageshack.us/img707/8192/xzyj.png)

Code Mark answered:

That serial not found.

i ve also sent him the authenticationmail from sepa, the login system they were using at that time. Also no proof.

I checked every photo i ve done there to avoid these situations. Eldicato was given me another serial 1 year ago, here is the picture:

[\[IMG\]http://img593.imageshack.us/img593/2387/5dof.jpg\[/IMG\]](http://img593.imageshack.us/img593/2387/5dof.jpg)

This was the last serial i get from them. I dont konow if they are talking with each other or if both are blasting out serials which maybe got deleted later on by the other guy which got no clue about what was going on there. At the end, he also didn t accept this and here is his answer. I ve done nothing so far to correct their shitty serial ""system"" and try to help out as much as possible. Cause the mail is about 3 years old and i haven t got paypal anymore. With the serial and 3 pictures of proof, it should be possible to accept this. Also cause of the serials which was given to me by both! eventhough his answer:

Code That Serial not found as well !

Send me paypal email you bought the crypter with else shut the fuck up, don't waste my time.

Some people may think know, i just want to start a shitstorm on him, but that s not the point. The thing is, i ve bought a lifetime license, photographed pretty everything i get from them due to the reason, paypal or email may get lost and i am still not getting accepted.

Just want to warn you guys. If you get several mails from Mark ! or Eladicto, it could be possible that the serial won t work when you got trouble a few weeks later and your ""Lifetime"" license may get lost due to this ""issue"".

Faking these photos is pretty impossible cause i ve photographed the screen and if you check the pixels there wont be an edited once. Eventhough the serials were both given by them, they should be in the system and both are "not in their system". The conversatong with him, how he talked to me and the fact dont accept this as proof and deleting my lifetime license, with a lost for me about \$75 are some key facts you

should keep in mind if you buy this product and this ""service"" i am spending my money other

people who respect each other and won't scam people like this.

Other threads where people are having problems with Bytecrypter or at least Mark!

Negative (-3): I would not trust this user.

After checking his TOS I am absolute right. You never listed anything about saving the payment details in paypal or the e-mail to proof the license so the serial should be pretty enough!

This fact is not included in the TOS so Mark! you even broke the rules. You got absolute no clue about business.

Royal ! - September 3, 2013, 11:25 am

All I had to say is Above. Also faced many other n00bs like you in my almost 3 years selling experience of Byte Crypter, Also faced those who don't know what they are Talking about. BBye.

Que - September 3, 2013, 11:42 am

At least it has nothing to do with rules if you gave me 2 legit serials which are ""now"" not working anymore. You seem to have no serial system and start making every year a new one without including the old one. Or you made a mistake in correcting them, even though it's your fault not mine and you scammed me for \$70. Guys just take another crypter.. there are many out there with much better service. He could check his paypal account for received money but he didn't. He scams lifetime licenses, maybe there are too many customers and the server won't stay up long enough anymore.

I prepared as best as possible, also the -3 rep shows that you are a bit overcharged in handling your project. This project may glitch out of your hands?

n0\$3ratu\$ - September 3, 2013, 11:57 am

One big mistake of Mark is that he is selling lifetime licenses.

On the other hand Mark is right, provide paypal payments and you will receive it back.

I usually don't interfere in threads like this, but Mark is right in every aspect.

Knight King - September 3, 2013, 12:02 pm

MARK IS A KID WITH COMPOUND EMOTIONAL ISSUE.

HE'S QUICK TO RAIN ABUSES ON YOU IF YOU MAKE GENUINE COMPLAINT. HIS INTENTION BEING TO INTIMIDATE AND PROVOKE YOU, THEN SAY EITHER YOU BROKE TOS OR JUST DUMB.

I AM A VICTIM OF THIS COMPOUND IDIOT AND THE USELESS SHIT CALLED BYTE CRYPTER.

THERE ARE DECENT CRYPTERS ON HF OTHER THAN HIS SHIT.

kastiel - September 3, 2013, 12:16 pm

Sadsoul, just because you failed to follow his TOS, doesn't mean it's a bad crypter, or bad support, just means you failed to follow his TOS.

Que - September 3, 2013, 12:20 pm

n0\$f3ratu\$ as mentioned in the thread i got no paypal anymore and provided 2 serials which was given by him and his college eladicto. If you won't have paypal anymore you automatically lose all your rights on a license, till the next update or till the next hwid update? They were given to me by them. It's not like i created my own serials :o. mark got raged and got me scammed, also -rep he isn't the good guy from 2011 anymore. He got mad with his project. Also the crypter isn't fud anymore. rather buy another crypter guys

ChromiumHF - September 3, 2013, 1:08 pm

This is why lifetime licenses are the reasoning for abundant problems.

Que - September 3, 2013, 3:49 pm

He has no TOS for this. He never said, keep the email or payment details to show on proof later on. He broke his own rules with not providing it after i showed him the messages with the legit serials. Gonna do a report yet.

n0\$f3ratu\$ - September 3, 2013, 7:37 pm

He doesn't have to say "keep the email or payment details" that is your job.

Anyway my honest opinion is that you got more then you paid so move on.

Que - September 4, 2013, 5:29 am

at least not. When you talk to sw companies, are you saying:"I've got a bill about the product" or do you say:"here is my serial, please update my product, thanks". This software distribution shit here works on low level user but the real world would punish you. Facts are, he got no clue about his serial system, every member could be faced to have a non working serial from now on. He can't handle his project, it's running out of fud too often the last weeks. I guess this project will fail till january 2014. Rather buy a new crypter.

Fact is no real company does Lifetime membership for a flat fee. And if they do, expect to get charge for major updates and so.
