Thread: [iBoot 4.0 // Unique DDoSer](#)

Dark Coder - April 17, 2010, 11:35 pm

Hello HF. This thread is currently a place holder, as its 2:30AM and I'm tired! I'll give a brief explanation though!

iBoot 4.0 was once Hotb0x 3.x; Hotb0x had some problems connecting to the shells sometimes, so I've recoded it from scratch. I bring you, iBoot 4.0. There are some differences, a new GUI, and the basic version comes with 2 SHELLS! Yes, 2 shells! Boot almost ANYONE off XBL, and even maybe take down some small sites!

Screenshots:

Will be up tomorrow.

Since I'm not trusted due to bullshit scam reports, my partner Avery will be making an OFFICIAL thread, consider this maybe a heads up thread I guess? Avery has 90+ rep, and is 150% trusted.

Price for iBoot 4.0: >>\$10!!<<

Comes with 3 months updates!

This is the same price as Hotb0x, but includes better shells, and even an EXTRA one! :)

Please note : Previous Hotb0x Customers will continue receiving Shell updates for 2-4 weeks, depending on how bitch you guys are, considering that shell updates weren't even included (: If you would like to upgrade to iBox 4.0, PM either me or Avery, the cost will be \$5!

Phucked-Up - April 17, 2010, 11:45 pm

Omni -10'd you. Good luck selling.

cybr - April 17, 2010, 11:53 pm

Another money-making method, Andrei? Good luck.

JustHayden - April 18, 2010, 7:05 pm

FAIL. LOL told you this would happen..... shouldnt have scammed me either

? ILL?mi??TI ? - April 18, 2010, 7:07 pm

another thread...just see this as a fail and spam
