Thread: [ALL EXPLAINED: Jays Booter + LOIC/HOIC + Free Booters + Dos/Ddos!](#)

Sir Michal - September 3, 2013, 8:36 pm

Ok well I'm tired and probably you are of Beginners joining hackForums and asking for Jays Booter and LOIC/HOIC same shit.

Ok so if your a Beginner watching this, Read the descriptions about these Things.

Jays Booter

--

Doesnt work, Because:

Shells have expired a very long time ago, Jays Booter used to work untill shells got abused by people. So dont you think even if you use Jays Booter and it says "Attack sent" Or what ever it will 100% not work untill Jay makes another Shell booter.

LOIC/HOIC

--

Complete shit. why?

It works as a Denile of Service attack based on your own connection

It doesn't matter if your internet connection is 100mb fast because LOIC/HOIC uses only about 10% of it to keep your connection alive, But don't be fooled, if you run more than 3-4 LOICS/HOICS on your own connection you will loose your internet!

And also that it's very dangerous using your own connection to send a attack because you can get tracked amazingly easy! Example: Lets say I will throw a Potato at someone, They will obviously see who it is just like with Dos, But there is a few ways of them to not know who threw it. I will explain 1, If you buy a Server to Dos with, and send a attack, the victim can see who is causing the dos attack, So you will have to Spoof the Server, another potato example: So last time when you threw a potato at someone they knew who it was, So this time wear a mask with someone else's Face on it, and they wont know who it was! Just like with spoofing you server!, But watch out you cant spoof your own IP address!, I mean you could wear a VPN but that's not really Spoofing.

Free Booter's

--

Don't bother, Just buy 1, why?

Well because you cant just expect someone to provide you free Ddos/Dos service attacks, I bet your saying "Hey! There has to be someone! that does!" Yes you are right, there's a few people that provide some over used 10mb/ps Free booters, Here heres one of them-

<http://www.ipstresser.com/>

What is Dos and Ddos?

--

Ok well lets start of with Dos, Dos is a 1 way Denile of Service, Well what do I mean 1 way? I mean 1 Dos source that provides the Packets, Just like LOIC, It uses 1 Connection/Server/Shell/slave, It uses 1 Denile of service provider. Now off too Ddos, a Ddos attack is very similar to a Dos attack but it has more than 1 Ddos provider, A good example is LOIC, If you run LOIC on your Connection it's a Dos, "1 way attack" But if you run 2 LOIC's on 2 Different connections like 1 at your friends house and yours for example that's a Ddos attack since it has 2 Connections flooding the same IP address

which is no longer a "1 way denial of service" It's now a "2 way denial of service" And it gets higher and higher.

Guys thank you so much for watching this, You could give this thread
????? So that all the beginners would see this! And sorry for my bad grammar.

Mojo™ - September 3, 2013, 8:40 pm

Thank you for the thread! Something like this really needs to be stickied. Good job.

Destroh - September 3, 2013, 8:44 pm

Thanks! Got tired of skids on Xbox mixing up DDOS and DOS.

Furtive - September 3, 2013, 8:46 pm

This should help a lot of people out, assuming they will actually read before posting.

M?trix - September 3, 2013, 11:07 pm

Yes, this will be very helpful for people that just join the forum asking for a booter lol.

Google - September 4, 2013, 12:23 am

People really need to learn before even coming here. There's wikipedia pages, and there's google.

To all new members out there: Please learn how to use google and wikipedia before posting here. If you cannot find your answer to your question, then post it here and someone will gladly help you.

muzzy. - September 4, 2013, 12:44 am

Nice little thread. Thanks for the share OP ?

Th3PonyWizard - September 4, 2013, 10:55 am

DoS, not Dos, not dos, DoS. Same goes with DDoS. Denial*, not denile. Work on your grammatical errors.

Sir Michal - September 4, 2013, 12:10 pm

(Sep 4, 2013 10:55 AM)Th3PonyWizard Wrote: [\[CITE\]](#) DoS, not Dos, not dos, DoS. Same goes with DDoS. Denial*, not denile. Work on your grammatical errors.

Thanks for reminding me, I'm Polish and I'm pretty sure I mentioned something about my grammar in the Thread???

#Sim - September 4, 2013, 12:12 pm

awesome thread man! I hate seeing people asking for OIC and jbs all the time..

dubwub123 - September 4, 2013, 12:15 pm

It's hilarious, I was just about to ask a question about booters, the exact same ones you mentioned. So are there any FREE good ones?

RAT Support - September 4, 2013, 12:47 pm

I'm glad you post this because I'm getting fed up of people spamming me on skype asking where to get jays booter and how to use it.

Sir Michal - September 4, 2013, 2:45 pm

(Sep 4, 2013 12:15 PM)dubwub123 Wrote: [\[CITE\]](#) It's hilarious, I was just about to ask a question about booters, the exact same ones you mentioned. So are there any FREE good ones?

I don't think you read the part about free booters did you? lol

A???????? - September 4, 2013, 3:20 pm

(Sep 4, 2013 02:45 PM)Sir Michal Wrote: [\[CITE\]](#) I dont think you read the part about free booters did you? lol

I bet he didn't read anything actually, which proves my point:

There is no need of making such a thread, since skidz will keep flooding and asking NO MATTER what you do.

Well at least you try.

Swirl - September 4, 2013, 3:22 pm

lol nub forgot that slowloris is #1

Grimzyy - September 4, 2013, 3:23 pm

This should help out the new skids to know the difference.

Thanks for sharing.

Th3PonyWizard - September 4, 2013, 3:25 pm

(Sep 4, 2013 12:10 PM)Sir Michal Wrote: [\[CITE\]](#) Thanks for reminding me, I'm Polish and I'am pretty sure I mentioned something about my grammar in the Thread???So what? English isn't my native language as well so it's not an excuse. I cared enough to develop my writing abilities to the point of actually being understandable and grammatically correct most of the time as well. It's not that hard, just overview your text couple of times before sending it.

•**Lucifer** - September 4, 2013, 3:27 pm

(Sep 4, 2013 12:15 PM)dubwub123 Wrote: [\[CITE\]](#) Its hilarious, I was just about to ask a question about booters, the exact same ones you mentioned. So are there any FREE good ones?You make my brain hurt please read the thread ?

DragonWarrior64 - September 4, 2013, 4:46 pm

Great thread man, this will help the newbs. :pirat
E;

Totionna - September 4, 2013, 6:43 pm

This NEEDS to be stickied. Will help soo many noobies! (I know I look like a noobie, but I also know \$5 can go a long way for a booter haha)

Mommy???????????? - September 4, 2013, 6:45 pm

Actually, your information on free booters is incorrect.

My friend Squeaks had received a free booter off of HF today.

And it hits home connections/MC servers.

So you should fix that.

#YOLO - September 4, 2013, 6:47 pm

Amazing thread. I like how you compare it to a potato. It will help explain it IRL xD

Plain - September 4, 2013, 6:48 pm

Really HQ theard and now I know the different between dos and ddos.

Innovation. - September 4, 2013, 7:06 pm

Remind me when another skid asks me for a download of LOIC or Jays Booter to send him this.
Good tutorial.

Kaoticbro - September 19, 2013, 5:26 am

Just what I needed, ty my man for these!

PhoenixHF - September 19, 2013, 5:30 am

Please fix the grammar errors:

It's DoS, not Dos or dos.

It's DDoS, not ddos or Ddos.

It's not denile it's Denial of Service (DoS) or Distributed Denial of Service (DDoS).

moogz - September 19, 2013, 5:38 am

nice thread man. it clarified a lot.

Sir Michal - September 19, 2013, 8:09 am

(Sep 19, 2013 05:30 AM)Wolf TM Wrote: [\[CITE\]](#) Please fix the grammar errors:

It's not denile it's Denial of Service (DoS) or Distributed Denial of Service (DDoS).

Lol, whats up with kids these days and their caps? you dont need caps in ddos on dos, -_- and i know i miss spelled denial.

And + you use caps in like every single word bro.

Givenchy - September 19, 2013, 9:09 am

Good thread , it's time that this shit is going to stop.

Aura - September 19, 2013, 9:20 am

Finally something that might keep new skids from asking stupid questions ...

Goodjob OP, if you make your Guide more presentable, I'm sure it has more chance to be stucked somewhere.

L33t1Ab - September 19, 2013, 5:47 pm

Thanks dude very helpful, helped me alot. =)

Sir Michal - September 19, 2013, 11:24 pm

No problem guys!, Make sure to share this link around HackForums to decrease the amount of question asked!

Black?jack - September 20, 2013, 12:13 am

Definitely a useful thread for the beginners around here. There really needs to be a sticky in here with something like "common beginner questions answered," and this needs to be part of it.

Bewbs - September 20, 2013, 3:07 pm

Bumping this so new users can read this thread.

?

Bob White - September 20, 2013, 3:08 pm

I feel terrible for your generation if this is info newcomers need. Good job providing it however OP ?

1996 - September 20, 2013, 4:21 pm

Awsome threas dude , i hope you post more of these good stuff ;)

Innovation. - September 20, 2013, 10:56 pm

Spoiler ([Click to View](#))http://i.imgflip.com/3r71r.jpg

These booters do not work, ESPECIALLY Jay's booter. All the shells are dead, LOIC spams your IP to a website, and HOIC... Same thing.

Mafugsa Bob - September 21, 2013, 3:15 am

(Sep 3, 2013 08:36 PM)Sir Michal Wrote: [\[CITE\]](#) What is Dos and Ddos?

First you should explain what the letters stand for. DDoS = Distributed Denial Of Service, DoS = Denial Of Service.

A DoS-attack is when the attack comes from one source (not source-code, but actual source). Such as you, the skid, with your Perl "DoS program". You flood the target with packets (if you don't know what packets are, educate yourself) in the hopes that the target will become unavailable. IE the service will be denied.

A DDoS-attacks is the same thing, but with multiple sources thus making it stronger. DoS-attacks are easy to detect and prevent, as you're getting a shitload of packets from one source. A DDoS-attack, not so very easy.

Why did I write this? Well your explanation was shit.

lol, I clearly mentioned that, maybe if you kept your eyes open while reading that thread you would see, Please read all the other comments, your the only 1 who's complaining.

terrorr - September 27, 2013, 3:54 pm

Just now i checked my firewall protection , and work very good:) Bot net same work very good but max attack i received for 50 mbps :) Soo where is this 200 mbps:D LoL

Mr. Corleone - September 28, 2013, 12:55 pm

Even though I knew everything already, I enjoyed the thread.

Thanks fo' sharing :)

tp24tp - October 16, 2013, 3:55 pm

Good description its easy to follow

Sir Michal - October 18, 2013, 7:59 am

Thanks for all the support people, but there's still people commenting with stupid sh't :/

Dextraction - October 18, 2013, 12:50 pm

This is a nice thread, however I think it should be tidied up a little. Nevertheless, nice job. ?

Exhile - October 18, 2013, 1:30 pm

Now this is put the correct way great information for beginners

enci - October 18, 2013, 2:04 pm

Good job bro. It gave me some new informations aswell :)

rockstorm321 - November 14, 2013, 7:31 am

THANK GOD you didnt give a link to that poor excuse of a program "Jays Booter" lol

Sir Michal - November 14, 2013, 9:01 am

(Nov 14, 2013 08:31 AM)rockstorm321 Wrote: [\[CITE\]](#) THANK GOD you didnt give a link to that poor excuse of a program "Jays Booter" lol

Haha, Jays booter was good until the shells died bro :D

ItzFreaze - November 25, 2013, 9:51 pm

awesome thread man! i hate seeing people asking for OIC and jb all the time...

Legit Hackz - November 26, 2013, 3:17 am

very helpful. thank you so much sir micheal

ghost of christmas past - November 26, 2013, 3:38 am

(Sep 3, 2013 08:44 PM)Destroh Wrote: [\[CITE\]](#) Thanks! Got tired of skids on Xbox mixing up DDOS and DOS.

You shouldn't. In most cases, you can refer to a DDoS as a DoS.

ShadowForge - November 26, 2013, 4:50 am

great guide for noobs but i bet 90% of people here know jays booter and free booters kinda suck compared to the paid ones and as this is hackforums everyone should know what a ddos attack is

(Nov 26, 2013 04:38 AM)ghost of christmas past Wrote: [\[CITE\]](#) You shouldn't. In most cases, you can refer to a DDoS as a DoS.

not really cos a DDOS is a distributed denial of service which is what XRbooter is with the botnets etc

DOS is a standalone attack that one user does like the oldschool ping of death. and other programs such as LOIC and many of the paid booters on this forum use servers to take down the target

A_Hacker - January 9, 2014, 8:12 pm

Actually HOIC worked for me though on this slow website.

Sexy Devil - January 9, 2014, 11:55 pm

thanks for this info...

very helpful post..

Sir Michal - January 10, 2014, 2:32 pm

(Jan 9, 2014 09:12 PM)A_Hacker Wrote: [\[CITE\]](#) Actually HOIC worked for me though on this slow website.

HOIC is the same as LOIC bro, and Hack forums is not slow.

UBERLEETHAXSNOR - January 28, 2014, 1:02 pm

Thank you for the great tutorial! Learned a lot!

Greetings,
UBER

Scymo - January 31, 2014, 6:37 pm

This should help a lot of people out, assuming they will actually read this before posting.

Sir Michal - February 1, 2014, 5:10 am

(Jan 31, 2014 07:37 PM)allstarmike403 Wrote: [\[CITE\]](#) This should help a lot of people out, assuming they will actually read this before posting.

Yep indeed, people should keep posting so that other people can see this.

imahacker97 - February 8, 2014, 4:32 pm

But I like throwing Potatos at people :c

FlashTrik - February 8, 2014, 4:50 pm

Meh nice job explaining. I remember when I first heard of Jay's booter, and I'm like, "Who's this Jay guy :O" haha.

Florist - February 8, 2014, 4:52 pm

Hey if the owner cares they can maintain a free booter with decent power.

FlashTrik - February 8, 2014, 4:55 pm

If the owner is out to make money, then yes imo.

Jagster™ - February 8, 2014, 5:01 pm

Hopefully this threads stays on top of this section, I am really tired of seeing people asking for free booters.

OP, if you make this thread more appealing on the eyes (make it look fancy) it would go a long way.

None the less, good job.

Hoxer - February 8, 2014, 5:24 pm

Thanks dude very helpful, helped me alot. =)

Sir Michal - February 9, 2014, 9:24 am

(Feb 8, 2014 06:01 PM)Jagster Wrote: [\[CITE\]](#) Hopefully this threads stays on top of this section, I am really tired of seeing people asking for free booters.

OP, if you make this thread more appealing on the eyes (make it look fancy) it would go a long way.

None the less, good job.

Yep, I would edit it and make it much better but I can't, on the other hand I could make another thread like this one, But I have a feeling it won't get far.

Reciprocal - February 9, 2014, 9:36 am

I like the potato examples nice job.

Humbles - February 9, 2014, 9:45 am

Nice to see that some people finally know the difference from DDOS and DOS, and this is a good for the randoms that join and think there big hackers.

Jagster™ - February 13, 2014, 4:13 pm

(Feb 9, 2014 10:24 AM)Sir Michal Wrote: [\[CITE\]](#) Yep, I would edit it and make it much better but I can't, on the other hand I could make another thread like this one, But I have a feeling it won't get far.

I am willing to help you with a nice thread layout if you want. I sent you a PM regarding this. LMK ?

th3j35t3r5c4v3 - February 13, 2014, 7:07 pm

Nice! Pretty good explanation man. ^.^

Axon™ - February 13, 2014, 7:51 pm

Finally, Thank you, hopefully that means I wont have to explain to people anymore.... Yet most new people make a thread without looking at any other threads with information like this.

Nightmare™ - February 13, 2014, 11:21 pm

This was an awesome thread. Very HQ and I thank you for this.
