Thread: [Please help me to decrypt MD5 with Salt](#)

savemysoul - April 18, 2010, 7:24 am

please help me to decrypt MD5 hash with salt.....

0ab7ca49b8bee7a0b06a4e18647c5e70

or..can you help me "tool to decrypt MD5 with salt..." ?

THanks.....

I don't think you know what you are talking about. Why don't you do some research on what salting is.

Great Prosperity - April 18, 2010, 2:18 pm

Salting makes it nearly impossible to crack an md5. Therefore you should give up now.

salt is a random code to add to the difficulty hackers to crack encryption

example: (salt + plaintext) + salt = password

or perhaps into a more complicated form

but thanks.....?

sorry I'm not very good at speaking english?

blackbone - April 19, 2010, 12:00 pm

cracking a salt is between never and never.

romAne09 - August 16, 2011, 12:22 pm

got that right I've been trying like for ever. these things will drive you mad if you continue trying to crack it i nearly got knocked out stayed up 19 hours trying to
