sent pm with question about ratt mentoring service

Treeple - November 23, 2013, 9:21 am

Just downloaded DarkComet and TinyManipulator for my first RAT experience. I had no problems setting up the RAT. However when I encrypted the file. Something went wrong, the slave wasn't added in DarkComet. He added me on Skype, explained the problem and he added me on Teamviewer.

He tried some different settings and things until finally the slave showed up! :) He even kept answering questions after the mentoring session was over. So superb service!

Vouch for this gentlemen!

Ordered the RAT teaching thingy, will be intresseting too see how it goes. Payed thru LTC

Edit:

So, After some time I am now playing around with the rat and I have to say, xVulnerable did a good job.

After paying with LTC, he installed a rat for me and showed me the basics..

The "mentor" part wasn't that big. I mean, he answered my questions but it wasn't like he gave

me a 24h guide on how to code a rat and how binary code works. I don't mean to complain, he did what he promised to and he did it good. There can be no doubts over that.

This guy is good, You will get what you payed for and he is honest.

Yes sir SJDB works with Java 7u21 and below.
If the user has a higher version it would act like a normal JDB.

well.... he did some jdb for me but i want'ed sjdb xD well id like to vouch for this guy xD

EDIT.

Taking Back my Vouch until i get my help, i did pay this guy first time about 25\$ and one more time 15\$ and i did have too pay for host/domain's n stuff like that and the only thing that he did where like seting up a Web Page [SJDB] ,
after that he did some small explaining how n stuff
but i din't get it.....

and i think he changed out he's own server whit mine since
mine server don't work either doe's the web page... and
he's still telling me that it work's n stuff :)

i where asking help from u, but now i see u don't give a shit about people u just care about the Money they give you.

Sir, you paid for an SJDB setup and a bit extra for FUD crypts.

I setup your SJDB and crypted your server and you kept asking me a lot of questions and i answered. But you keep asking me the same question over and over again and i answered it clearly about 5 times but you still don't get it. You paid for an SJDB setup not for RAT mentoring so i am in no way obliged to keep helping you.

Your server doesn't work because there's something wrong with your setup, don't worry i don't need your bots.

Read the thread. "Although although i will attempt to portforward router this is not included in this service as all routers differ from each other.If there are any proplems this can be solved with a VPN".

Get a cheap VPN to solve the portforwarding problem.

Raiden69 - June 10, 2014, 3:36 pm

I might actually order one of these packages seeing that I have no time to set up a RAT and am not experienced.

I was wondering, do you know how to setup LuxNET and how long does the process take?

PS: Are you Maltese my friend?

Haha awesome, it's nice to see a knowledgeable Maltese citizen on this forum :).

Anyhow, I'd like to proceed with the RAT Setup + RAT Mentorship package.

How do I purchase this package? Do I add you on skype so that you'll guide me through the transaction process from there?

I cannot send you a PM as I do not have more than 25 posts. My old account got locked due to inactivity :(

Wouldn't recommend this service to anyone.

He tries to steal your money by not telling you the downsides at all.

All he told me was that the SJDB would install on any computer that opened the link. Me being stupid, accepted that and paid him to the service for me.

What he didn't tell me is that the SJDB only works for Java 7, Update 21 or lower, which I'm pretty sure noone that the people of HF are attempting to target even have anymore. (Java's latest update is 60, which is 39 updates away.)

Then states that it was obvious that it only works for lower versions of Java, but then still admits to not telling me that it doesn't work for modern versions.

Ho there,

I'm a few posts shy of being able to PM, but I am definitely interested. I've tried CG, and had small successes, but was never confident enough to trust anyone out here not to piggyback. But CG just isn't working anymore at all with both PCs on Windows 7, and now I'm ready to ask for help and try something different.

Hope you can come through! ?

I just Ordered a Setup from xVulnerable.. waiting for him to set me up

michael7812 - July 25, 2014, 8:00 am

I have ordered a Full Rat Mentoring Setup

unoquepasaba - July 25, 2014, 9:25 am

I would like to purchase the 25\$ option :)

PM.

w1zdM - July 25, 2014, 11:45 am

I'd like to purchase. I have added you on skype :)

diaenaY - July 26, 2014, 2:04 am

I just ordered sjdb setup, waiting for him to set me up.

michael7812 - July 26, 2014, 5:23 am

Great assistance. Was able to explain every step so you could understand it easily. It was a awesome service. Very easy to talk to and 0 pressure during the whole thing.

Big vouch for op

Jeffery Parker - July 26, 2014, 6:30 am

Edit: My apologies, was angry. Good services going to order your help desk for 10\$ if ok.

xVulnerable - July 26, 2014, 6:34 am

(Jul 26, 2014 06:30 AM)Jeffery Parker Wrote: [\[CITE\]](#) Asked if he knew anything about a RAT, ignored me and deleted me from skype.. Sketchy shitty service.

You didn't pay for this service. I have a help desk for a reason.

unoquepasaba - July 26, 2014, 6:51 am

I ordered a 25\$ option for setup rat + rat mentoring. :)

Vouch for the guy, quick and efficient.

IVlysteryMan - July 26, 2014, 12:13 pm

This is awesome. People on this forum really know what they are doing.

Jeffery Parker - July 26, 2014, 12:36 pm

Update: Made a 10\$ payment for him to set up my services, will post back how it goes.

Update 2 hours after talking to xVulnerable: Couldn't correctly port forward my router, says it is my routers issue even though I have port forwarded before, recommended me to buy nVPN for 6\$ a month, told me it takes 2 hours to receive my login details. 2 hours later, he dissapears from Skype and I don't get a login for the VPN.

TDK - July 26, 2014, 10:40 pm

I'm really interested. I'll send you a PM now.

Paid. Talking on skype.

xVulnerable - July 26, 2014, 11:29 pm

All setup done. Online & taking orders.

TDK - July 26, 2014, 11:31 pm

I bought a full service at 21/07 and it worked perfectly at 21/07 when i try it on my friend.He really helped a lot with it including the full setup, that everything he does from teamviewer client.I forgot to write these because after 1-2 days of this transaction i went on a vacation.

Now i came back home and i think theres something wrong with setup.exe or something changed i dont understand and i know that xvulnerable will help me when he become online and feel comfortable about this problem :)

please contact me at Skype, best wishes

perfect RAT work

Spotter-HF - August 4, 2014, 10:59 am

massive vouch for this guy! full rat set up, vpn, jdb, macro exploit, crypting service, and silverlight

exploit.

Its not just a set up, he talks you through everything he does and explains why hes doing it and how it works. it doesnt come much better than this!!

I purchased the Silent JDB to be set up, which was \$38 + \$13 for web hosting and a domain. I also paid \$10 to have the RAT setup, here is my outcome.

~ Silent JDB Review ~

When I purchased this, and I'm sure when everyone else purchases this they want it to run on the updated java as it's not useful at all if it's not. SO, before you purchase this, realize it's not going to work for any java update except version j7u21. (which wasn't posted in this thread)

Yes, I'm an unsatisfied customer with this Silent JDB as it doesn't work

~ Setup ~

I have paid \$10 to have it set up, it took two days to complete but that's simply because we were both tired. However, once we were done setting it up, I was told I had to speak to xVulnerable over HF and could not speak to him any further via Skype.

I have to admit, that I regret being purchasing the Silent JDB for \$25 for something that doesn't even work.

I'm not posting this crash your thread for sales, but it's only right for the people who purchase your products to know the real outcome.

Isnt this just completely pointless.. the SJDB doesnt work for newer versions...

Java drive by's are so useless now, all can be found for free...

would not waste \$25 on something which is free now and doesnt work

I would need RAT mentoring and DOC/EXCEL Macro Exploit,

But when I click on Paypal, there are 2 options package 1 and 2.

So package 2 includes RAT mentoring and DOC/EXCEL Macro Exploit?

If so, I will buy that,if not advise me how to buy those service?

Thanks

Should I buy an exploit kit for \$90 which includes silent jdb & adobe flash, but apparently only infects IE users

Or your SJDB package? Which is more effective I wonder.

Guy said 10-30% infect rate with his exploit kit on IE traffic. Let's say 30% of your 1k traffic is IE - 300. Then 10-30% - 30-90 of 300 get infected. Sounds pretty shit. You can of course by direct IE traffic but it's expensive

What is it ideal for?

Even if the link itself gets posted to like 22 million real people? (Not direct traffic. Got a good SE in mind to make people want to click it)

Paranohack - March 27, 2015, 8:59 am

I paid 25 dollars for a "Full rat setup + Life mentoring".

All I got was a quick setup, that anyone can find on youtube & do by himself ... I'm a total noob when it's about RAT but what he did I did exactly the same by myself with DarkComet & tutorial video.

It took him like 5 minutes total but it lasted more than 1h30 due to the long period he was afking/doing something else during the process.

He wasn't even explaining anything. I feel like totally scammed.

If you did not understand some part of the process, all you had to do was ask. I setup your rat, you ask questions and I answer. It's what you paid me for.

Paranohack - March 27, 2015, 9:28 am

I asked lot of questions before it even start through PM before you tell me to contact you on skype. You could have clearly answered this but you deliberately preferred to keep it vague.

Making people pay 25 dollars for what you do is just a total scam, anyone starting from no knowledge could do exactly the same wasting less money and time.

It's just impossible to ask you anything during the process since you're afk 9/10 of the time and then when you do it it's through teamviewer so it would interfere with the process.

Your announcement states that you "answer all questions regarding RATs" but all you do is just very fast executing what anyone could find by himself by typing "tutorial rat" on youtube.

xVulnerable - March 27, 2015, 9:34 am

Why would I deliver a service before being paid?

You could have asked AFTER the setup.

Sorry but my conclusion is that you are an idiot.

Recently purchased SJDB service he made me buy a domain and host and i had to wait for 1 day to get it. After tht its been more than 24 hours now no reply from him. He came only on skype and went off after i msged.

I paid 26\$ via PP, Did i just get scammed? -.-

I don't think any one can scam someone for sucha low price so i'm not jumping to conclusions but i have given him 5 hours to reply.

Or i call my bank and get a dispute for fraud as clearly i haven't gotten any of his "services"

Or maybe he is "busy" so can't spend a minute to reply to his customer who has paid him ;-)

Either way i don't tolerate bullshit. we'll see how it goes. :)

Hi xVulnerable. I am completely new to this. I want to remotely gain access to someone's Android

phone (Galaxy S5). My priority is their old WhatsApp conversations as well as a continuous way to receive future messages (some sort of live stream?). But I would also like to obtain their photos, including those kept in the S5's new feature called "Private Mode". I am willing to pay for this to be set up and then be taught how to remotely operate it from there on. Is what I am describing possible? If so, how difficult will it be for me to run it and of course, not be caught. Thanks in advance!

P.S. This might be relevant: I use a Macbook and am in the UK. My target is also in the UK but will relocate to Canada in 6 months. Phone will still be used there though.

Hey xVulnerable, are you still doing the SJDB + Website Setup service / package? If so, I am very interested, however I have 2 questions. Will I be able to customize the site to make it look really legit by completely copying off a different site? (A Steam page for example? Or just a fake "anything" really..?) Or will you do that for me?

My second question is: Can I have / add a legit looking domain thing too? So people will actually click on it.

Thank you.

is the macro exploit able to be used on macs to instantaneously install the RAT? And is this program compatible with macs or do i need to use a pc.

Let me know,

THank you

I got one more question, because the SJDB is working on j7u21 and lower, is it worth buying/trying to spread with it. Is anyone using old versions of java?

will like to subscribe, however i need to know the following cuz i do not have a RAT currently.

do you provide RATs along with your set up /mentor fee or is there a separate price for a RAT ?

does this mentor/set up fee include the macro exploit doc/excel or is that separate too?

so basically in summary ;

i have no rat , i need one , i need help setting it up and finally i need it concealed in a doc/excel macro exploit, so whats this gonna cost me . thanks.

Yes he have tons of good rate in his reputation but if you check in detail you'll see that all his good vouch are completely unrelated to SJBD, Jspy, RAT....

If you check all his bad reput you can see that everyone is complaining about SJBD, Jspy, RAT.....

Have many scam reports...

Just dont buy anything to thing unhonorable guy he dont deserve anything.

Hello,

I'm sending my first post since your offer was year ago and first to know if you were still running your mentoring services.

Also I I would like to know the following:

1) Do you mentor/teach total noob like me?(I tried to get familiar with RATS in 2001/2002 but since I did not find assistance I was not ble to set them properly so I did not get any result) And by total noob I mean you reallly gonna have to start really from scratch with me.

2) I m planning to acquire a coder to make the RAT not detectable by AV of the family member's computer I m planning to monitor. Does your teaching assist in using a coder which will have been bought from one of the HF member?

3) To monitor effectively my family 's member computer (all of them leaving not in my place) I guess I ll need to bind it. I ve read about the DOC exploit. Do you help or explain how to bind the RAT with DOC files or do I have to get from HF member a software for this purpose? though being a total newbie I think you ll have to explain me how to use it as well

4)Just to know in general what would be your average availablity. I have a lot of work going on for now so I don't think I can start the mentoring before mid june /beginning july So just to know if you will be in vacation at that time and an estimation of how many hours it takes to teach all the above to a total newbie and if all the above is included in your mentoring.

Since I'm new to this forum I won t be able to PM you

I m planning to use Nanocore since from my reading it is the best RAT out there

if we make a deal I ll pay you the tuition fees mid june at the beggining of the mentoring. I m just looking for a teacher who is not only going to do what I need but who is going to explain me how this all stuff works in order to be self sufficient in the future.

I m in Europe so please tell me if you are in aera with hours delay if that s migt be an obstale to the mentoring program.

Would be happy to read from you .

Sincerely yours

Hello,

Usually I don't make report or ask refund, however, this time is different because of his ignoring.

I did buy two things from this guy:

1. Mass Torrent Spreading; which does NOT have any method at all, no private, no public, no unique, nothing at all; just telling what does torrent mean & what does programs mean as well .. lol

2. DOC Macro Exploit, which is just word file, no builder, no tool, nothing professional. It's just simple word file that even does NOT work.

I sent him Pms, and he replied once every 24h, then he stopped responding.

However, I did open a dispute at PayPal.

Good luck guys

Alright,

Here is a screenshot that you will refund me when you didn't gave me what I paid for.

Go and be honest, did you gave me where I paid for? Simply NO.
