**Genocide.** - September 9, 2013, 1:44 pm

Why allow DDoS and spoofing if you don't have unmetered bandwidth.

**VENETX** - September 9, 2013, 2:48 pm

@Genocide.

Because I am not letting someone use up 10TB+ just like that.

Besides when I had my own DDoS server for 1 month I only used up 5TB at the most.

**VENETX** - September 10, 2013, 9:15 pm

I also do take in custom packages, just PM me or submit a ticket

**Young Pop** - September 16, 2013, 3:48 am

**VENETX** - September 17, 2013, 10:58 am

@Sonics

Thank you very much for saying this! :D

I never did know anyone found my company out by using google. XD

~Tom~ - September 17, 2013, 11:00 am

Do you own <http://vpsdatabase.com/> ? because that's where the thread linked me to.

VENETX - September 17, 2013, 11:27 am

@~Tom~

No it is not my website. Why are you asking me that?

Mabel Simmons - September 18, 2013, 4:27 am

legit guy and good luck with sales too my friend

WhitePantha - September 18, 2013, 3:16 pm

Do you also offer bullet proof domains?

~Tom~ - September 18, 2013, 3:28 pm

I wouldn't deal with this user, I'm about to open a scam report if I don't get my refund.

VENETX - September 18, 2013, 9:50 pm

@bossyisha

Thank youv very much!

@WhitePantha

No, only VPS.

@~Tom~

Stop playing the innocent person here. If you want a refund then MOTHERFUCKING REQUEST IT! Jesus fuck.

Could careless for \$4

I haven't even got a ticket from anyone for a refund of the OpenVZ.

Not even sure how you couldn't even follow my simple tutorial i posted on my website on how to turn your VPS into a VPN.

I turned my VPS into a VPN within 30minutes or less without a problem. Picture related.

oG Encrypted - September 19, 2013, 5:57 am

I'm interested in this. What guarantees can you provide should my server magically disappear after a day?

VENETX - September 19, 2013, 10:12 am

@Fate

I've been here for almost 2 years. Started June of 2011.

If for some reason I can't make the 3G each month to pay for the server's I have I'll use all the personal money I made from the hosting industry into paying whats needed to be paid.

I have some money built up already.

My question being, your provider bans these servers..? And how do we know you aren't selling the same server toble multiple people? And guaranteed spoofable?

I've PM'd you, would be nice to receive a PM back shortly.

As of now, I can't recommend this. Purchased one, root p/w is wrong, no support in roughly.. 5 hours. Will change/remove this upon this being fixed.

**oG Encrypted** - September 21, 2013, 11:25 pm

All resolved, here. Took a while to get back, but as stated above he had real world things. Thanks.

**VENETX** - September 22, 2013, 12:37 am

@Fate

You're welcome. Sorry for all the confusion.

I have just been so busy in real life and could not get to any internet access on my laptop.

**oG Encrypted** - September 22, 2013, 2:21 pm

Output right around 70-80M with decent list. Not bad for price

**VENETX** - October 13, 2013, 6:14 pm

@Fate

Just because owner doesnt reply on the Sales thread anymore doesnt mean its dead.

**VENETX** - February 10, 2014, 5:47 pm

@dannex001

- Anything allowed changed pricing. Its due to a new server which doesnt really care what you host but they have guideline on CP.

@CloudRick

I just don't like spamming my own thread and being active on it. You can check my activity though that I'm always on...

@Ixm

Thanks for replying to this thread for me. :D

Just a bit busy with work .

**0x03a8** - February 11, 2014, 10:51 am

**Internap** - February 18, 2014, 12:42 pm

Wait, so your dedicated servers located <http://vpsdatabase.com/dedicated.php> have spoofing enabled?

**VENETX** - February 18, 2014, 9:31 pm

we stopped selling spoofing and all this due to twats exploiting the products and therefor making it a un-saleable product now.

Yes, mine were different but decided to go a bit legit for now.

**Mellowmz** - March 29, 2014, 4:15 am

So we cant use the servers for ddos anymore ?

**VENETX** - December 10, 2014, 6:29 pm
