Thread: [Spreading well, 325 seeds on torrent but only one vic, help?](#)

SamsongLINK666 - September 6, 2013, 7:08 am

Hey all, I'm using DC 5.3.1 and I have created my torrent and spread it in lots of places. I current have 325 seeds but i only have one vic. ive port forwarded correctly, my no-ip duc is running, listenting to the right ports. anything that i could be forgetting ? thanks for the help guys!

soldierjason - September 6, 2013, 7:10 am

Is your file fud ?! ... Did you test it before spread?

SamsongLINK666 - September 6, 2013, 7:11 am

yeah of course. i'm using Icryptex and Razor's file binder

[RuN] - September 6, 2013, 7:13 am

And they are both detected by antivirus at runtime

SamsongLINK666 - September 6, 2013, 7:15 am

hmm. any fud crypters that are free?

Marwix - September 6, 2013, 7:17 am

you cant find a FUD free crypter here on HF im afraid, you have to buy one for FUD status :(

soldierjason - September 6, 2013, 7:18 am

No lucky i think... Free crypters are useless ...

**it is just my opinion..

SamsongLINK666 - September 6, 2013, 7:20 am

Guess i need to learn about making a fud crypter... this is gunna take a looong time. Too poor to pay lol

soldierjason - September 6, 2013, 7:26 am

yeah . i wish i have that knowledge... ! ..

SamsongLINK666 - September 6, 2013, 7:48 am

no virus thanks scan with Icryptex says 1 in 14. still not that bad though right ?

The results you are getting might be only scantime not runtime .

SamsongLINK666 - September 6, 2013, 8:23 am

is there a way to scan for runtime ? sorry if im a bit noobish

Sander070NLD - September 6, 2013, 2:13 pm

(Sep 6, 2013 08:23 AM)SamsongLINK666 Wrote: [\[CITE\]](#) is there a way to scan for runtime ? sorry if im a bit noobish

The only way to test for runtime is to actually download the antivirus and run the software, if it's detected then it's not runtime. If you decide to end up doing this be sure to disable that the antivirus shares the sample.

Also coding your own crypter is really difficult and could take months.

Next time scan your file here: <http://www.nodistribute.com/>
It uses 35 AV's instead of 14.

Good luck!
