Thread: [Fake key generator needs update/dll etc.?](#)

anatho - September 7, 2013, 9:23 am

Hey

On another forum I found a thread telling if you plan to offer a fake key generator it would be a good idea to actually provide the program (e.g. in VB), but if you click generate the progress bar will go to 100% and then a message pops up that it is outdated/dll missing etc. and you have to go to website xyz where you can download update/dll. And on this site you make a link locker.

Ok quite a good idea, BUT: what to show in the video then? you cannot show that it brings an error/update message after you click generate, because then it is revealed that you need update/have to do survey etc.

So what to do?

gimegime - September 7, 2013, 9:32 am

Create your keygen/generator/hack record video and show them that's working fine, then open that project in VB and change the code.

This is good stuff , but i don't recommend it because soon everyone will start doing like this and ppd will fuc*edup .

Then don't content lock a fake DLL. Nobody said you needed to use a Content Locker to do this method.

anatho - September 7, 2013, 9:40 am

No content locker, it is just that normally everyone gives the generator as a link-lock, but I give it as a free download. You do not have to do anything to get it, just download it. But then when you run it, it will show an error message (it will work, but it shows you need an update). So to get this update, you go to another landing page, and there you will get the update download, but not for free, it is link locked.
