My Review :

Uptime - The grade for Uptime i will be giving to Hyper Stresser is 10/10.

I have used them for a while and the site was never offline!!

Design - The design of the booter is great! Looks nice and feels nice! 10/10

Power - The grade that i will be giving to Hyper Stresser is 10/10 because the power is just out of this world.

Tools - The tools are very easy to use and i never had an issue with them, so i give 10/10.

Private Messages - Never had a chance to try it out but i believe it's nice.

Other Note - Sending attack - The not so bad thing on this booter, but i have to mention it, is that it takes 10-15 seconds to send attack. My overall review is 10/10.

I would recommend this booter to everyone, because it simply rocks.

Well, about the uptime, my friend uses it and it was trying to go on and it was down.

So id saay like 98% of the time uptime.

I used to be support for hyper stresser and I am currently good friends with the owner.

I personally love this stresser either way, best it have used.

Glad to hear your like it.

Awful review. I know it is your first, but all you done was write about 10 words for a few features.

Thank you for the honest review mate, much appreciated. ?

if you have any issues, just PM me :)

BlueRey - September 8, 2013, 11:46 am

Thank you, I really really appreciate that

Why so we only have stresser reviews in here? Why don't we have regular product reviews as well?

You could just leave this on their sales thread....
