Does this crypt .net files? I got Legion Miner and Flash IRC Bot I would like to crypt. Wondering if this would work with them.

yes, it can crypt .net files mate! :)

Simaniurity - September 16, 2013, 4:53 pm

He sent to me two versions of this crypter and any of these programs dont work properly. First crypter generates .exe files 13/35 FUD (!) and doesnt have option for change icon. Second crypter doesnt work, I have got a lot of errors when I want do crypt my file. From the week I dont have answer from seller. I opened a dispute on PayPal, but seller asked me to close dispute and asserted that he can fix crypter for 2-3 days. Trickster and a liar.

stefsot - September 16, 2013, 10:15 pm

He cant make it fud cause he didnt code it.

I also have a scam report on him open.

He just said to me that he is quitting HF and that Ill never get my money back. There are better crypters, just let this go.

Stefsoft is right guys don't buy this its never going to be FUD and insidious is a scammer scam report : [Link](#)

BisualZ - September 20, 2013, 9:52 am

Big scammer! He said he will pay me 15€ for the signature he is using but I got nothing.

muratoguz - January 19, 2020, 8:12 am

I have this resource I'm having trouble compiling
is there anyone who can help me with this?
