If were talking about speeds I can say that it is the same speed as my normal internet speed ?.

Big Vouch and recommends this service to Everyone.

(Oct 9, 2012 04:24 PM)Damnation Wrote: [\[CITE\]](#) Review:

I recently purchased Anonymous VPN, to stay secure when doing minor hacking jobs (All whitehat, and VERY minor.), and for general safety over the internet. When I bought it, I had some initial troubles. I am running Linux (My Distro is CrunchBang) and the networking set up for VPN's is less than admirable. I contacted The user "?NONYMOUS" about my issues, and he replied with sold advice, and a link to a website giving the problem more depth. It took me 15 minutes to get it setup. But it gets even better. If your using windows (you probably are) you get a link with the VPN info that fully details exactly how to set it up.

Note: I am writing this review as a silent "thank you" for ?NONYMOUS's great service, and support. I wasn't asked to do this, nor was I paid. I just like the program, and ?NONYMOUS.
