I've asked some reviewers like Taserz and Vuz3, but neither have enough bots.

hey when will you be adding the stealers?

z3r0fr3ak - April 22, 2010, 11:46 pm

please for the love of god, stop calling it polymorphic usb. this is not possible at best its a autorun.inf

generator with random data at best.

Stability...

I would totally hate this bot if any other flood is added, or stealers.

Flooders are dumb, you can just run DL's on a Booter Client. Stealers are dumb, use iStealer.

Sry about the delayed response.

I agree on the stealers, but adding udp,http,ssyn ?

How is adding all making it unstable ?

Thoe udp will make you able to take down servers, witch is the only feature I need, + the other once in this bot.

magret - April 26, 2010, 11:51 pm

2 question

bypass firewall ?

good stability (how many robots the bot can suported ?)

Are you still selling?

Why would you "Not be interested in it anymore"?

We have resellers, and if anyone wants it, PM/Add me.

jam3s - April 30, 2010, 9:18 pm
