Thread: [Been paid, looking for a lightweight laptop.](#)

Luke - September 8, 2013, 12:40 pm

I have around £400 (~\$650) to spend. I'm looking for a lightweight but fast and reliable laptop for college, (software engineering), so must be able to run VB/Delphi confidently, etc... Can anyone recommend anything?

In a \$650 budget? For his needs? Re-read the post. ?

OP. Dell's high performance series XPS. Also, look at ASUS.
