Thread: [lpuservices.com Earn Money From Idle Computer Time !\(Earn up to 17\\$/day\)](#)

mohcinsnake - September 11, 2013, 1:55 pm

Register for Free [HERE](#)

More Information about lpuservices.com

Idle Processor Utilization Services, LLC, purchases unused/idle computer processing power at a fair price, then re-packages it and sells it at a profit. 100% of profits are distributed to our Members, which include all Division Managers. It is our goal to distribute the ownership of Idle Processor Utilization Services, LLC, to ANY Member who wishes to invest time, money, and energy into this project. This is not altruism – this is fair compensation for hard work, planning, and execution.

You EARN MONEY by simply leaving your computer on. No purchase is necessary at all to earn money. Simply Register (below), and [download](#) the process software (Available 9/1). That is it.

Of course, you can multiply your earnings if you wish, although doing so is not required. You may build a referral list (you make % of referrals), you may upgrade your membership, you may build (or buy) a downline, install more computers, etc. The possibilities – and the earnings – are endless. What you earn is completely up to you!

I was just going to ask if anyone had any information about this. Has anyone tried or been paid from it yet?
