Small TUT On How To Get One Free Scan Daily
[Provided By AnonScanner](#)

Link: <https://anonscanner.com/>

A Scan Result: <https://anonscanner.com/result/6426d090978c395250c0291851365412>

Image Scan Result: <https://anonscanner.com/image/6426d090978c395250c0291851365412>

What you can do daily, is either Scan a Certain file, or a Domain. You will have to wait 24 hours after each scan to reset and then you can get another free scan after. You can also do surveys if you want to receive scan credits. By clicking "Free Credits" button.

Sign-up?:

Yes quick and easy, visit this safe link: [Click Me](#)

How To Scan Your Files:

Firstly after the signup choose what you want to do in the "SCAN TAB " located on top bar like so:

Secondly, choose which ever option you'd like to pick; either a File or Domain:

You can also check the history to see if the file has been detected or not.

Spoiler [\(Click to View\)](#)

After you will be re-directed to a page which looks something like this: (warning big image)

Spoiler [\(Click to View\)](#)

Here you have all the information about the file as well as the results.

Finally, at the right hand side, you have options if you would like to show your scan result to anybody else, feel free to choose the link, image scan link, forum BB codes and a HTML Code.

Spoiler [\(Click to View\)](#)

Any Problems feel free to message me with or post below, thank you for reading my small tutorial on how to get ONE FREE SCAN DAILY.

What makes your service better than NoDistribute.com? They provide 5 free daily scans without the need for signing up.

Check out the site for more features bro, sure you will be surprised.?

Miki - September 15, 2013, 1:22 pm

The Timer will reset every 24 Hours, so you can re-scan another file.

Thanks bro glad you like it just extra 2 av engines.

Miki - January 25, 2014, 5:15 am

Just showing that this is still available for a free scan every 24 hours unlike s4u :).

(I'm NOT associated with AS anymore just a notice!)

juggared50 - January 25, 2014, 6:13 am

Thank you for this good thread !

Now i can scan my server ?
