ICODE - April 19, 2010, 12:36 am

Neohacks spreading guide

Hello everyone i didnt know quite where to put this, but i think it is tutorial related to the various discussion part of this so im going to post it here, this tutorial  
i will go every method to spread effectively in the shortest amount of time.

Methods in this tutorial

Yahoo chat room

Msn messenger

forum posting

auto spreader

Youtube

Torrents

omegle

4chan

java drive by

P2p

getting fud for free

=====

Reference/tools/sites

=====FUDING

=====

=====

=====

Ok so lets start this tutorial off with a pretty simple thought process, most likely youve tried to spread before thats why you clicked this thread.

The number 1 reason for not getting servers when you spread is that your server is not fud

its a pain in the ass and we all hate it, so the very first part of this tutorial is going to teach you how to find a crypter and bring its fud rating down without a understanding of any visual basics, noob approved.

so the first thing we are going to do is download smart assembly, note that this only works on .net stubs,

if your not sure what its made with,well ask the creator.

To start off install smart assembly, and open it

you should see a screen like this

Spoiler [\(Click to View\)](#)

On this screen hit new project and then hit browse assembly and select your stub. if you see a button saying set destination

you are doing good now set your destination to the folder that the stub was taken from, this should be the same folder as the crypter.

now on this page select only the options i have selected and dont change anything else

Obfuscation

Spoiler [\(Click to View\)](#)

Pruning

Spoiler [\(Click to View\)](#)

When you are done then save the stub as the orginal name and add a tag so youll remember it i.e stub 1 - SA - ob prun

now make a folder called orginal and move the first stub into this folder now rename your stub to the name of the orginal stub.

You can scan your stub now if you wish good chance if it was slightly ud it is now fud.

This concludes making your server fud :) your one happy motherfucker now arent you omg omg its fud moment.

=====

=====

=====THE DRIVE BY

=====

=====

Im just going to give a rough outline of how to use this powerfull tool and what it is, and what it does.

The java drive by is a applet that calls for a file,  
your virus to be dropped in the victims temp folder then launched,  
causing them to be infected. Why is this good for you,  
well you don't have to send them anything other then the link and  
being the dumbass they are they`ll go to your site hit run and be infected with your server.

Im going to go over this using a example of a drive by i created and just today i got 38 infections from spamming 4 chan this is why 4 chan will be included in this tutorial.

now for my drive by im going to explain the niche i use, i use this site, do not click run !! no lol don't do it

[www.brittanyisawhore.t-3-5.com](http://www.brittanyisawhore.t-3-5.com) remove the dashes

Now i will explain the social engineering i use, the reason for my drive by is "out of revenge to a xgf so im "

"putting nudes and her cell # and her email on the site" This is something we can all relate too. It doesn't look like spam so this is win for us. Now you ask how can i get my drive by that i set up using the big link you gave me up there to look like yours. You can p.m me for the nice ones i charge for a basic one like that ill do it for free. Also many others of us will do it, but we recommend you learn html.

this concludes the java drive by and now your going omg thats amazing why didnt i think of doing that on 4 chan or 7 chan.

=====

=====YAHOO SPREADING

=====

Personaly this is how i started and is still one of my favorites to this day, it gives you a real sense of pleasure when you show them that there infected and still i.ming them.

What youll need: a yahoo messenger with 2 accounts  
\* make the accounts sompthing like sexyyysarah < what i use  
\*a reg edit to open 2 yahoos

Now we have our drive by that were using for 4 chan so lets go with what ive been using,  
so join the rap chatrooms works very well lol they all seem to be just that dumb, now as the random  
pervs start i.ming you

select one and "lock on" talk to him for 1 minute and mid conversation say OMG THATS HORIBLE my friends xbf

put up a website with a bunch of naked pics and her cell #

now wait for your response lol it can be anything even omg my house is on fire because he isnt going to care

you just told him naked pics and you look like your clearly not selling anything.

after you get your response tell him omg read that thats so mean,

send him your link and tell him dont hit run cause you dont want him seeing her naked but just read what he wrote about her.

^ YOU WIN

the msn method works in the same way that this does, except go to the teen chat in the link above and make your name sexy sompthing and tell them to add your msn and then do the same as before you will get massive adds very quickly

so this concludes my yahoo/msn spam method i have a 89% sucess rate lol  
the other 11% is macs

```

=====YouTube=====
=====
```

=====

=====

Now spreading on youtube has been discussed over and over, and i hear a comon complaint i cant get my video up high enough to get some real views, well the most likely solution is you dont understand how youtube matches keywords and discriptions to the search term so let me show you a way to see what youtube is looking for

Spoiler [\(Click to View\)](#)

so do you see the first result ? it is windows 7 keygen, that is what most users type in, now start with A and go threw to Z

as in windows 7 a windows 7 b and look for the top suggestion of each as it will be the most looked for video, now you have your targets for your video, now find something that you could bind your file too.

fake keygen perhaps or a windows 7 activator that you discovered when going threw a-z

Now make a quick video, using cam studio or whatever else you can find and show the program in action and upload it, now this is the important step to getting a video to get a high ranking.

The title of the video should match the search term identically, now move down to the description make sure your search term is in there also and for your tags use only 1 and make it your search term.

Now ask a few people to give you a thumbs up, and use the auto refresher for firefox and jack your views up to about 100.

Additionally i will be releasing my software soon, all in 1 youtube tool so look for the release soon :) its called proxybrowse

This concludes matching keywords when you are spreading on youtube

```
=====
=====
=====TORRENTS
=====
=====
=====
```

Ok so you have a few dozen rat victims and your feelin like the man  
lets get you a few hundred more added  
to that, just for starters anyone who knows how to make a torrent already well click the spoiler,  
it contains a good order for torrent sites to use for uploading your torrent

Spoiler ([Click to View](#)) To Start-right now

<http://www.seedpeer.com>  
<http://www.btjunkie.org>  
<http://www.bitenova.nl>  
<http://www.fulltvs.com>  
<http://www.torrents.sumotorrent.com>  
<http://www.idealtorrent.com>  
<http://www.extratorrent.com>  
<http://www.torrentzap.com>

tier 1 - wait about half the day

<http://www.fenopy.com>  
<http://www.torrent.ws>  
<http://www.torrentreactor.to>  
<http://www.torrentportal.com>  
<http://www.torrentreactor.net>

tier 2 - about 12 hours later  
<http://www.torrentdownloads.net>  
<http://www.monova.org>  
<http://www.torrentmatrix.com>

tier 3 - same time tomorrow wait till its really moving tho  
<http://www.vertor.com>  
<http://www.torrentbox.com>

tier 4 - bang we have lift off  
<http://www.#.org>

by now you should have a listing on torrentz.com  
and if you do expect to get mass dl`s if ifs a half legit file and fud

if you dont know how to make a torrent read this  
Spoiler [\(Click to View\)](#)  
<http://hostbooter.com/OtherTuts/TORRENT%20TUTORIAL/TORRENT%20TUTORIAL.html>

Now you know how to create a torrent but your still wondering well how does this help me ?  
well just keep reading. what your going to do now is find something people want that actually  
works, so what i would suggest is Hazzars wat remover, its standalone.  
some av`s flag it already good for you, now find a fud binder and take the torrent you downloaded  
bind to it and re-upload it i like to say {fixed}  
in my version as if theirs something wrong with the other one works pretty well

=====

=====

=====P2P

=====

=====

=====

im not really going to say much on this its very simple just fallow unspokens tutorial on it, it will get  
you a nice ammount of downloads  
once it starts getting its foot in the door.

Spoiler [\(Click to View\)](#)<https://hackforums.net/showthread.php?tid=314698>

=====

=====

=====OMEGLE

=====

=====

nothing much to say here other then give you the link for the kickass bot to leave on while you sleep, but i will tell you how i use it  
i make my messages so that it can start from anywhere, and then spam that my x is a whore and out of revenge i put up this website, and her # and naked pics are on there so call her and tell her sheas a whore, bye

omegle bot

Spoiler ([Click to View](https://hackforums.net/showthread.php?tid=223548))<https://hackforums.net/showthread.php?tid=223548>

I think this about wraps up my tutorial on spreading and i hope if you found this usefull youll say thanks and enjoy everyone.

**Irelandrulz2** - April 19, 2010, 12:39 am

Darn that is pretty darn good!

**olo** - April 19, 2010, 12:45 am

I Must Say I Agree With Irelandrulz2

**ICODE** - April 19, 2010, 2:35 pm

bump cause i finshed yesterday

**Skittles-** - April 19, 2010, 2:37 pm

I wouldn't mind a tutorial on getting referrals via spreading if you're willing to make one.

**ICODE** - April 22, 2010, 4:04 pm

bump comeon guys i put quite a bit of effort into this tut and its my first, fuding stubs made simple and a great tut give me some feedback ?

**DarkVirusManiac** - April 22, 2010, 4:41 pm

(Apr 22, 2010 04:04 PM)neohack Wrote: [\[CITE\]](#) bump comeon guys i put quite a bit of effort into this tut and its my first, fuding stubs made simple and a great tut give me some feedback ?Didnt read all of it, but I read some. Seems very nice for RAT users here.

**Ridgey** - April 22, 2010, 4:46 pm

Great tutorial, very helpfull to new members!

**Lordcam** - April 22, 2010, 4:55 pm

thanks..!!!! uhhyyyy!!

**White Collar** - April 22, 2010, 10:17 pm

Love the guide especially the drive by part, is there any way you could make me one, I could send a \$1 paypal your way!

**Troxin** - April 23, 2010, 12:51 am

It is a good tutorial!

I wish your thread was edited a little to be easier to read, but NICE! :D

**blksith0** - April 23, 2010, 5:59 am

Nice tutorial! I will be trying this.

**blksith0** - April 23, 2010, 4:51 pm

FUUCCKKK the java thing auto-ran. Oh shit..... what was in that t35 thing? I thought a thing would pop up but it didnt, damn.

**TheInvader** - April 23, 2010, 7:47 pm

Good guide man. It would be great for spreading a rat.

**Ghost™** - April 25, 2010, 7:35 am

nice better making it into an ebook so you can sell it :)

**ACDC** - April 25, 2010, 7:43 am

i will be repping you tommorow also thanks for the torrent guide im a noob to torrents cheers!

**breaker** - April 25, 2010, 7:49 am

The omegle bot does not work, however NICE GUIDE! thanks for sharing =]

**ICODE** - April 27, 2010, 12:17 am

thanks everyone, first tut, and yes the omegle bot is fucking up, the creator needs to update it, if he dosent i'll consider putting one together realistically its very simple.

**ICODE** - April 29, 2010, 1:22 am

bump . . . . t  
. . . . . r  
t . . . . o  
. o . . h  
. . o s

**zorro59** - April 29, 2010, 2:16 am

Thats nothing:))

WTS

<http://www.youtube.com/watch?v=XzFBX18Up9k>

**????** - April 29, 2010, 6:19 am

Pretty sick tut nice ?

**ICODE** - May 5, 2010, 5:30 am

Bump

"The message is too short. Please enter a longer message"

**itmone22** - May 14, 2010, 9:48 pm

THE crypter or fud you have listed on tut does it make it like 5/20 infected? rather know before download my own does 7/20

on scanner.novirusthanks.org

but nice tut btw :) i got 70 bots in 3 days starting with 1 :)

**StarStream™** - May 28, 2010, 9:16 pm

This is a nice tut thanks for posting it

**Nukka** - May 30, 2010, 12:36 pm

Nice post... edited well nicely detailed 10/10 (happy face) (Less than the number three)

**Grift.** - June 25, 2010, 7:13 pm

Man this is awesome, it deserves a huge

BUMP

**Sin666** - June 25, 2010, 10:58 pm

Very nice, thanks for the info =D

**emes3k** - June 25, 2010, 11:11 pm

Great tutorial! It's very helpful for beginners!:)

**zoh** - June 26, 2010, 7:08 am

Nice tutorial there, some of them were new for me:)

**bryce3325** - July 8, 2010, 10:51 am

This tut is freaking awesome 10/10 :)

**Fuzzyhacker** - July 8, 2010, 12:13 pm

Very helpful tutorial. thanks for sharing it with us man

**Cubby** - July 16, 2010, 1:09 am

Good shit Neohack, your the man

**???** - January 8, 2012, 8:48 pm

Very HQ and well thought through, thank you.

**Overpowdered** - January 24, 2012, 7:31 am

Darn, this is a really awesome TuT.

Thank you!

**swippz** - January 29, 2012, 12:49 pm

Thanks, this was very helpful and good methods

**shock\_t** - January 29, 2012, 1:39 pm

pics don't show up mate, unless it's just me

**tulamba** - January 29, 2012, 2:15 pm

Where are the images in the tutorial??

**nightangel70** - January 31, 2012, 9:16 pm

When using smart assembly, I created a server in DarkComet, and I picked my server (I created it and it was set as a .NET) and it said that it wasn't a valid .NET... How do I fix that?
