So I will doing all custom orders for thoe games. What you will get : x number of IPs' of people who either use aimbot or wallhacks from a very popular website. Now the way this is done 100% of them will have paid for hacks for that game I can even do as custom as do you want both aimbot or wallhackers or just aimbot or just wallhackers. Make me an offer for a number of IPs' and a price. All the IPs are of people who have cheated AFTER the time of purchase.

Contact me on Skype if you are interested in this service.

I have been thinking of posting this for months.

So... basicly what people are buying are, IPs who seem to have cheated in OTHER servers?

Sorry but this just doesn't sounds good hahaha

No there is a 100% guarantee that they have and use cheats. Normally the cheats are 100% undetected... They can have never been banned on any servers ever... and not "seem" 100% they do. I will not give you the method ,but 100% they CHEAT and they PAY to cheat.

carlos_matos - September 13, 2013, 2:17 pm

What you're doing is taking IPs of people who HAVE purchased or used hacks once in their life. That doesn't mean they're hacking right now.

Stupid service.

Stupid service.

That is not what I am doing. My method entails them hacking and using their hacks AFTER the time of purchase.

So like I said, you just put the IPs of people who get banned on other servers for purchasing and using hacks into the server's ban file.

The fuck is your problem that is not even close to my method please fuck off. Please stop trying to trash me thread when you don't know jack shit about my methods. Also it seems you can't read English, or your trolling if that is the case fuck off like 20x over.

BarneyStinson - September 13, 2013, 5:25 pm

This service isn't exactly fair. You're getting IPs from members at x22 and selling them here? Also, you've forgotten that some people have a dynamic IP that would render this service useless.

You're fucking blind.

I'm not insulting you, nor am I insulting your service.

I am not trashing your thread. I don't know what you're doing, but I just explained everything that you wrote down.

You're ignorant, definitely not a good business model.

Most aimboters are really dumb and don't know how to un-plug and plug back in their router xD

That is very rude, and unprofessional. I would never purchase from someone like you.

By the way, it's you're.

Sorry just upsets me when people don't read it. They are not "suspected" or "alleged" hackers they are 100% guarantee they are hacking in that game after the time of purchase.
