Thread: [how to convert jpg to exe ? note \(not exe to jpg\)](#)

theshiningeagle - April 19, 2010, 10:02 am

im tring to search in google and i cant find anything

is there a way to convert jpg to exe but not by hacking program so it not going to be detectable

ofcourse u will ask why i want to

the answer is with iexpress way to bind files

u cant not actually bind exe with an image but i want to try to convert the image to exe

in this way the file will not be detectable

please help

JPG to exe....? ?

Just use a crypter? ?

Ramsay448 - April 19, 2010, 10:06 am

I dont think thats possible..... ?

As Cyberspace said, just use a crypter

no1me - April 19, 2010, 11:10 am

look for jpg to exe program google

you will find what looking for

I'm starting to get a bit sick of people asking how to convert executable files to jpeg, It cannot be done, You can disguise your executable to look like an image, But not actually be one. ? If you see this text say bananas :-)

Charity - April 19, 2010, 3:17 pm

He's saying .jpeg to .exe NOT .exe to .jpeg. I don't think there is really a way to do this, by the way. You can't really "execute" a picture.

_[THUNDER] - April 19, 2010, 3:33 pm

actually the binder in iStealer do it

but what other binder is made like that ??

DexHacker - April 19, 2010, 4:08 pm

The file will still be a jpeg (so you can not run it), but if you show file extension in windows and change .jpg to .exe it will be seen by windows as a exe.

Baig - April 19, 2010, 4:32 pm

hmmmm use stealer it will do for u man

Typical Smart Guy right here.

Hes asking for Jpeg. to .exe...

RadarX - April 19, 2010, 5:25 pm

It CAN NOT BE DONE. But, you can use this very effective trick:

Change the exe's icon to that of a jpg file.

Then, rename the file to something like, "sexy pic 1 - youremail@hotmail.com" the extension will be renamed to .com, which will execute same as an exe, yet it will look to 90% of people like an image :D

actually this is the best reply

it is not a solution for what i asked but this great idea

thank u so mush

im still searching for the way

and by the way

i dont want to use a binder which is detectable

i want to use a normal program that simply convert the jpg to exe

it is not even a virus

and i said why i want that

because i want to use iexpress for binding the files

and iexpress dont accept anything but exe's files

that's all

but now i have another proplem that im working to fix

when i get the solution i will post it

thanks for all who intersted and posted thier ideas ?
