Another one template I'm giving you for free.

It's a real estate template.

- Well organized
- PSD
- User registration system
- Adding new items (estates) for registered users.
- database dump

It's not a finished website, but I guess you can have a lot of use of it if you're planning to make similar site.

Looks pretty good it's clean, simple yet great, but I think you should have posted it on the graphics section.

Well, since it has some php too, I thinks it's better to be here.

There's user registering system, and uploading script included :)

Nope sir, you didn't understood the thread. This is the template I created, and I am sharing it with you because I don't need it.

If you still think it's nulled and I stole it, please give us the link where you saw this template to prove it's not mine.

Cheers.
