Thread: [\[Help\] Basic HTML + CSS](#)

Natalia Poklonskaya - September 18, 2013, 1:02 am

Can anyone help me with some basic HTML and CSS, just requires a question or two~

Please please, pm me on here, or add my skype
Thanks in advance.

g0han - September 18, 2013, 1:04 am

Post the question here or PM me and I will try to answer it for you

I might be able to help, adding you on skype.

Sorry I wasn't able to help. :c

As requested.

I need to put a CSS tabbed menu onto my website, I have no idea why it's not working, as I followed some websites instructions :((

The website says:

Upload the menu_source folder to the root directory of your website. This is usually where your index.html or index.php file is.

Then

Code <link href="/menu_assets/styles.css" rel="stylesheet" type="text/css">Into the header.

Then

Code <div id='cssmenu'>

<li class='active'>WebClient

Download Client (Windows)

IconicScape Wiki

Donations

<li class='last'>Vote

</div>

Into the body..

I have no idea why it's not working. Q.Q

It's hard to tell because you haven't posted your css, there could be more but as far as I can see theres a few things wrong with your stylesheet link.

But try removing the first '/' from your stylesheet path and adding in your ending " for type. Like this
Code `<link href="menu_assets/styles.css" rel="stylesheet" type="text/css" />`

Code `<link href="menu_assets/styles.css" rel="stylesheet" type="text/css" />`

This. Also if this file is in a folder thats not your root folder (/), then the link to get out of the folder and back to root is ../ so the code might need to be, if the files are in two different folders.

Code `<link href="../menu_assets/styles.css" rel="stylesheet" type="text/css" />`

Also make sure the stylesheet is called styles.css, as this is normally just called style but your code calls for something called styles

Thanks for the help guys, I finally figured it out, all by myself!

the refference in my heading of the HTML was refeering to /menu_assests, while it was ment to be /menu_source

XDDDD

Lol, I scanned the whole thing for like 15 minutes trying to find what was wrong, and I don't know how but I noticed it :)

Bugs like that can be the most annoying things, especially when it's something like an "|" instead of an "]" buried halfway through 800 lines of code.

I look forward to solving one of them problems, XD XD
