Thread: [Making signatures!](#)

**Dashmaran** - September 18, 2013, 7:33 am

Here's the deal fellas, you provide me with a image and the size that you want for a signature and I will make it for you.

I'm out of practice so this will at least help others (or maybe not lol if you dont like do use)

?

I can't even have a signature, but it could be used for other forums. Use this please:

500x200 please.

Great work buddy, requested a sig in the other thread!

Simple crop and a few effects on the background. If you're malpracticed, challenge yourself bud!

Thanks I guess? Feel free to make a better one

I'm just stating, you have potential. Use it. Challenge yourself. Don't sit there making the same things. Work on text effects and that sort of stuff. Play around with GFX. Like my signature? I made that, I've had four years of Photoshop practice. Just keep trying and working, you'll get good!

I like the Lighting on it and the watercolor effect. Good job Dashmaran

Dashmaran has engaged me in a GFX battle, and I must say that I was a little impressed.
