Thread: [\[Scam report\] \\$50 Byte Crypter \[Scam report\]](#)

denoo9 - September 18, 2013, 9:21 am

I was user of this Crypter, Mark ! (<https://hackforums.net/member.php?action=profile&uid=577996>) says I broke some of the rules, he's saying Im scanning the crypted servers, but I never scanned any of it, now when you are reading this Mark ! , dont rage and dont mark me as a "shit ass dumb kid who doesnt know how to use it" but show me proof that I actually scanned something by myself, Because I NEVER SCANNED ANY IN MY AV Why the hell would i do it, im not dumb and I know how to use crypter.

Your crypter is awesome and i dont want to lost access to it, you dont even answering my appeal messages, what do you think I will just sit on the ass and look at you how your kept my hard worked \$50? (Yes its hard in Slovakia to get that amount)

Well say what you want but I want to use it again. No matter what.

I hope we can sort that now because normally I would never open any scam report, at least you should respond my PMs but you didnt.

Help me someone, this is a scam, why do you dont give a fuck?

Bewbs - September 23, 2013, 9:59 am

- 1.Because of your rep.
- 2.No pictures included.
