I'm looking at the moment to get my hands on a domain name, but if anyone wants to comment on it so far feel free, oh and if anyone feels like it any advice :)

Did you code the site your self ? It looks very nice and professional good jo with the site if you coded it your self.

I like it, nice and clean. Easy to browse, consider checking just dropped domain lists, and godaddy auctions.

No I didn't code it myself but it is built off osclass which is an open source project, I may add a few extra features to it later.
