Vaxorr - September 19, 2013, 12:24 pm

Your Complete Guide For Accounts Hacking

This Guide is an introduction to account hacking

Every Person want to hack accounts in social network websites such as Facebook , twitter , YouTube , etc... i will tell you the common 2 methods that every hacker use to achieve this .

First Method : BruteForcing

BruteForcing that's what i like to call it and it's the art of cracking the password with a wordlist contains many common words to try to login with to the account

Common BruteForcing Programs :

[THC-HYDRA](#)

[Brutus](#)

[Medusa](#)

[Ncrack](#)

[CentryMBA](#)

Second Method : KeyLogging Or RATting

A Keylogger is a program used to record the keystrokes that someone types and send it to you via email or FTP, and RAT is an abbreviation for (Remote Administration Tool) or (Remote Access Trojan) and it is used to control the victim computer control means :capture screen

remote desktop connect

play with his speakers

display message boxes

block websites

access to the registry

keylogging

opening the CD-ROM

visit websites silently or regularly

Download & execute

And Much More !!

and the most common and popular RAT's Are :

[DarkComet\(Free\)](#)

[BlackShades\(Paid\)](#)

[CyberGate\(Free\)](#)

[iRAT\(Paid\)](#)

[SpyNet\(Free\)](#)

~ Null ? ?

if you find any mistake or something wrong please tell me

Talu - September 19, 2013, 12:44 pm

Good guide. But the problem I find with bruteforcing is that the bruter times out after a few seconds...can you (or anyone) help (what are the correct settings)?

Auklape - September 19, 2013, 12:48 pm

Very nice I like this guide, hope you make more in the future :)

Vaxorr - September 19, 2013, 12:51 pm

(Sep 19, 2013 12:48 PM)Auklape Wrote: [\[CITE\]](#) Very nice I like this guide, hope you make more in the future :)

check my threads compilation in my threads ;)

Yes you are right!

Anyway after bruteforcing there remains only rating keylogging.

There is nothing new at the moment and we have returned to the old SE.

But yeah you can still try to bruteforce[you still get something not completely useless].

Jagster™ - September 19, 2013, 12:55 pm

I think you forgot the best (most successful method) for gaining access to a social network account....

Social Engineering.

Anyone else agree?

Talu - September 19, 2013, 12:56 pm

Social Engineering.

Anyone else agree?

Yeah, that's a good method. Agreed.

Vaxorr - September 19, 2013, 12:59 pm

i cant discuss social engineering here ;)

and bruteforcing works in some sites but not all

Aura - September 19, 2013, 2:39 pm

Bruteforcers doesn't work anymore on big websites like : Facebook, Youtube, Twitter, Gmail, even Hotmail.

So forget it.

Also you could had session hijacking in your guide, there's something to do with that to "hack" accounts too.

Vaxorr - September 19, 2013, 2:56 pm

session hijacking O.o this is a beginner guide i dont wanna talk about XSS , stealing cookies and sniffing ;)

Aura - September 19, 2013, 3:10 pm

(Sep 19, 2013 02:56 PM)nullserver Wrote: [\[CITE\]](#) session hijacking O.o this is a beginner guide i dont wanna talk about XSS , stealing cookies and sniffing ;)
Session hijacking is relatively simple too ...
And if while we're at it, it's a "Skid's Guide", because you have to agree, this is not REAL hacking ...

Vaxorr - September 20, 2013, 2:38 am

yes i agree with you but ..
Every person want to learn hacking just ask about these points that i explained , so i dont wanna go very deep at my guide and explain XSS and Metasploit , and session hijacking ? ?
sorry for any rudeness
my regards ,
-Null ?

Learning0000 - September 21, 2013, 8:20 am

where can i download those keylogs?

Talu - September 21, 2013, 1:20 pm

(Sep 21, 2013 08:20 AM)Learning0000 Wrote: [\[CITE\]](#) where can i download those keylogs?
You can download one called "syslogger"...it's right here on these forums.

AustinTV - September 21, 2013, 1:23 pm

What about social engineering. Like what...

Vaxorr - September 21, 2013, 2:19 pm

hey we cant talk about social engineering here ?

Vaxorr - October 4, 2013, 6:10 am

thread updated i have forgotted an important bruteforcing program , CentryMBA

qwertyui - October 4, 2013, 6:17 am

n1ce trick
thank you
i will surely try it

SIM-1729678 - October 4, 2013, 6:44 am

Cool Thread good explanation! trying in a bit Thanks!

Vaxorr - October 4, 2013, 7:56 am

nope bruteforcing actually still work for some sites like netflix , minecraft , and many of forums . ?

David Tennant - October 4, 2013, 8:34 pm

You are right, however sometimes they don't have the image verification. It's rare but it happens.

Vaxorr - April 12, 2014, 5:02 am

Bumping this as i see much people asking about what i covered in the tutorial

Gatt - April 12, 2014, 5:17 am

spelling correction its Sentry not Centry w 3ash :D

AnonymousHackerGirl - April 12, 2014, 9:39 am

Nice guide man, but RAtIng honestly is the best bet- have the time password crackers don't work on most big social media sites.

rippedtide - April 19, 2014, 1:39 pm

Hello NULL, I would want to get your service regarding RATting on a MAC. Can we discuss this further if it would work for my scenario before I commit?

Thanks.

Vaint - April 19, 2014, 4:28 pm

Very nice I like this guide, hope you make more in the future :)

z3roh4x1337 - April 19, 2014, 5:34 pm

Fud stealer, spread via youtube, easy lol

Vaxorr - April 24, 2014, 8:11 am

Bumping this as I see much people asking about what I said ihis Tutorial

Kind Regards,

Null

Davy - April 24, 2014, 8:33 am

Add MultiForce to the bruteforce/cracker list.

Vaxorr - January 21, 2015, 10:27 am

Bumping this thread, Hope someone find this useful.

Vaxorr - June 18, 2015, 7:21 am

Bringing this up. Bit old but might be usefull.
