Create a file uploader for Ge.tt and for the yo need to upload, all you gotta do is right click it, go to "send to" and click ge.tt. This opens the main form which you hook up with ge.tt's free api.

I already got an uploader for imgur. Now I just need the exact same thing for .exe and zip files.

Who's in for the challenge? ?

I'll start working on it now lol. Sounds pretty fun.

Be sure to release it and next apply for a job at ge.tt headquarters :)

So you're sarcastically asking others to do a job for you for free.
Shame is that some has fallen for.

I'm only inviting people to what I think is a great idea and something I would like to use myself.

spoiler:

here's how you do it you dumb fuck.
