Thread: [\[Src\] simple python Skype flooder](#)

m00dy - September 21, 2013, 1:27 pm

download / install this library: Code <http://skype4py.sourceforge.net/doc/html/Skype4Py-module.html>

src:

PHP Code

<?php

#####

Author: m00dy

Desc: Skype flooder by m00dy

ps: its made by me m00dy

#####

imp0rt Skype4Py

s = Skype4Py<DOT>Skype()

s.Attach()

taregt username (IT HAS TO BE USERNAME)

tar = "USERNAME"

for f in s.Friends:

 if f.Handle == tar:

 s.SendMessage(tar,"Good morning, " + f.FullName)

 s.SendMessage(tar," Your username: " + f.Handle)

 s.SendMessage(tar," Your country: " + f.Country)

 s.SendMessage(tar," Your Mood: " + f.MoodText)

 # here comes the flood part :D

 for i in range(0,10): # also change the 10 for the amount of lines

 s.SendMessage(tar,"A" * 2) # change the number to 1024 :D

The classic skype spammer, almost everybody's first python project nowadays.

Good job. You should try creating a call spammer using the call function and the time module.

That's practically as easy as the 'Skype spammer'.

m00dy - September 23, 2013, 2:05 am

thanks guys for the feedback, but tell u the truth i only though "hey is it possible to make something for skype in python?" so i created this and decided instead of throwing it in the bin ill just post it and continue learning asm

Dr. Strangelove - September 23, 2013, 2:15 am

Seems like something anybody can make after reading the module documentation a few minutes. Also, remove the faces from the comments in your code, that is bad practice.

Stop being picky about how he writes his comments lol. If I send a source to a friend of mine, and they are clearly adept at programming, I will put all sorts of weird stuff in the comments. It's the code that matters.

no way thats impossible

edit: i just looked at the date of this post oops
