C'mon guys! Great plans, Cheap Reliable and just complete out AFFORDABLE!! 160GBPS DDOS protection, sexy ass customer support and 99.9% uptime, 1% updating so what you guys waiting on?

BUY!! :)

C'mon guys! Stresser templates allowed on so your allowed to host stressers and some illegal activity. But you need to buy the add-on to enable it :)

MasterSnowball - October 18, 2013, 11:46 am

Just to update:

you are now allowed to use stressers! But to use, you need to purchase the add-on for 2\$ to enable this service! If you purchase without it and you dont purchase and you use stresser source then we will suspend! If you have bought and want it then open a support ticket and i will assist you on how to purchase!

Thank you.

-- New members --

When purchasing hosting, It will ask for a add-on, choose the allow illegal activity add-on to enable stresser templates use.

Thank you!

No i havnt lost interest in any product? Just because i was offline doesnt mean i have?

It was down due to my DC changing nameservers to my server which i only found out as i was in hospital but i am back now.

Everyone who has been effected by this will have more time on there account. So dont worry,

I appologise deeply for the downtime. But its all back up now :)

The hosting is located in france sir,

Overall As i said on my website, There was to be some slight downtime/slowness due to me changing over clients from old billing system and also updating templates and billing system configs and to get use to it.

That is why that happened. Anyway, the updates are now 100% complete and there should be no more issues as of now. Thank you very much.

Your firewall might be blocking connection due to our security :)

Or if you were DDOSING etc from your ip, it got blocked from our system so you need whitelisting.

Thank you very much sir.

Our security sometimes blocks any threats it detects. Or your firewall might be blocking access due to our security, Thank you sir.

You need to buy a domain elsewhere as i dont sell domains currently. Thank you very much. Name.com is a good domain hoster. But from them then click on " Use current domain "

He's reselling OVH. The actual host has DDoS protection on their end and that's what he's using.

Anyway, I just wanted to say that OVH is a pretty good host. The prices that OP offers is pretty appealing. Just tested my site and it's blazing fast after using it with CloudFlare.

2- Are the server downtimes a lot? Because I really need a proper webhost.

3- Is it offshore?

Hello sir,

No there isnt downtime atall, All the downtime is gone since we changed ips etc.

It is Onshore but we let most stuff. Just once it doesnt tamper with server its grand. No bandwidth drainers either, shells apis etc as stated in TOS.

Thank you sir.

Well that i have no idea why/how that happened sir as no other clients received that issue, Our servers are fast which all our clients said in previous statments. Maybe that was because of your connection?

Thank you.

My website is loading very slow at the moment. There is definitely something wrong at the moment. Could we get an official statement?

I only bought this hosting because KFC Watermelon recommended it for Plasma HTTP. If this is the standard then I might consider changing, as I will lose bots due to the bad connection.

Peter DragonSlayer - April 27, 2014, 3:14 am

Purchased a website host from Reimhosting yesterday. Worked for the first 5 minutes, but then he had some unusual errors on the site.

Hes been keeping me in touch and ensuring that my hosting is properly setup.

Site should be up soon.

Hello there,

Site is now back up! Had some minor downtime due to some issues regarding a client of ours but everything is back up and on track!

Sorry about the downtime, All clients where informed and with an explanation on what was going on. We are now back up and back on track!

Thank you.

Is it just me or is the site down? Just checking wanted to check this out!

MasterSnowball - May 5, 2014, 7:05 am

Hey guys,

Reimhosting cant be ddosed with our DDOS Protection. I am doing some slight maintenance on the server and will be back up online As soon as possible! Thank you very much for understanding.

MasterSnowball - May 8, 2014, 9:47 am

I apologize for the downtime. This was due to some clients abusing our servers. All is now fixed and all clients are receiving adding time on there hosting. Thank you very much for understanding! We should no longer have any downtime.

Hello sir,

This is Onshore hosting. But we have a policy where we allow pretty much anything just ONCE your service doesnt tamper with our servers. Aka no DDOS Scripts as they use our resources and we dont allow that. But if for example a sms bomber, I guess we would allow just once it doesnt tamper with our server.

Thank you for your interest in Reim Hosting!
