Nope sorry im just a reseller for this service

M?nst?R - September 22, 2013, 9:16 pm

lol, All you need to do is null it by changing/editing a small bit of code on the license functions, But you will not be able to get updates there for its will lead to massive security issues and is no way worth the price.

300euros for a cracked version?

I better put in 100 more and get a legitimate version with annual updates.

Test Server available via Teamviewer

I could be interested if it were cheaper. Just doesnt make sense to take a modified version for \$100 less when getting the real thing with direct support is superior. Perhaps you want to reduce prices?

Nex+ - April 17, 2014, 5:05 am

Looks interesting, if it was a lower price I'm sure you would get a ton more sales on this.

OriginersMc - December 18, 2018, 2:38 am

I have the full license system of cPanel/WHM, DirectAdmin, CloudLinux, LiteSpeed, Plesk, JetBackup, SoftAculous, CXS, WHMCS and etc with cheap price.(cPanel/WHM \$40/yr ;)). It'll bypass the main license server and validate your system with my license server.

I can provide you one month free trial, then you can pay.

Also no need to use nulled version and accept the risk. You can use the latest version and also update it.

Your price is crazy considering people can install a nulled version themselves free of charge.

I can make you trust. Trial and demo available. Send me email message, I'll explain more for you.

Buy cpanel license only for 4.99/mo from licensedash.com instead of paying too much in forums.
