Thread: [Realistic looking signature?](#)

Canada - September 22, 2013, 10:06 am

Was just wondering what the best font would be to create a realistic looking signature in Photoshop.

Just a guess though, fonts are not the best to fake handwriting.

Great link Invisus. I was about to suggest just that.

Invisus is right. Fonts are not the way to go. You need someone who has a graphic tablet to make you one. Fonts repeat themselves where as signatures are always slightly different
