want to learn how to ddos game servers???

Viam Inveniemus - September 22, 2013, 12:34 pm

Buy a booter.

Or are you telling us? idk by the way you wrote it.

sanman12 - September 22, 2013, 12:38 pm

i mean i want a proper link to learn n buy dis stuff

NeymarS - September 22, 2013, 12:45 pm

1) Use proper English, people are taking the time to respond to you, you can take the time to right "this".

2) Go to the market place and look for a booter. However, you are going to have to pay. It's not as simple as saying "1, 2, 3 DDOS!" to take out a server. You need to buy a booter.

This.

On both point.

Also depending on the game server you want to DDoS, you'll have to buy a powerful booter.

I hope youre not a 12 yearold by the number in your name

Black?jack - September 22, 2013, 2:46 pm

I'd suggest learning the mechanics behind a DDoS attack before attempting to perform one, else you're no better than 90% of the other skiddies on here.

Sir Michal - September 22, 2013, 3:59 pm

I suggest you go back too school, get a higher grade in English, then study computer science in collage, Because right now you lack both of these.
