I don't wanna do this anymore..

Also I am no longer good friends with my friend I made this for.

You've already ruined the purpose of this thread after displaying the scan result from virustotal which distributes samples to anti-viruses. So, the 1/48 detection will be like 5/48 in the next couple of hours. Obviously, this depends on how powerful the crypter is.

Recep Ivedik - September 25, 2013, 2:54 am

No, it won't be ruined, I'll upload a link in the next 2 hours if you want.

I personally do not care, as I do not have a use for your crypting service, I was just giving some knowledge which you can either take it or leave it. Regardless, it's just a good habit to use scanners that do not distribute samples.

Yeah, I know thanks anyways for information. Now I am a little more clever ?

But do you know other scan device, when I say device I mean like virustotal, that won't disturb my file?

If yes, please send me link :D

RazorScanner is a good one: <http://razorscanner.com/>

BlackShades: <http://bshades.eu/scanner.php>

Element Scanner: <http://elementscanner.net/>

I wouldn't trust the first one as they use their own api and stuff not scan4you api.

Thanks for info, do you know better one? Then please send here.. :) And I'll input virus scan.?

Habbodealer - September 25, 2013, 5:52 am

Not a legit member.. added him on skype. as he would refuse a skype screenshare so i could see what he had done and if he chose my stub, i am 99% procent sure it was just a simple scam too get me ratted that he just sendd me his own stub. Be very cautious if you try this "service".

Dude, you wanted me to be infected by you.

Are you mad over I said no? Stop bullshitting.

Grieve™ - September 25, 2013, 7:02 am

Pretty sure this user is using my free crypter for this service. Please stop.

Recep Ivedik - September 25, 2013, 8:01 am

? I really love your crypter, but Iam not the guy that actually crypt, Iam making this threat 4 my friend

:)
