Thread: [PHP Coder - Automated shop](#)

aSmoo - September 25, 2013, 9:58 am

I need an automated shop coded, A couple of guys told me that they can do this but at the end they failed.

I will be paying \$300 for this. (Half of the amount will be sent to a MM when you start the work)
I can pay via PP, WU.

This must be done in under 1 week. Nothing more as this is urgent.

Automated shop must be 100% secure, I'll ask some guys to pen test it before I pay you.
I will send you a sample shop script I have (it works) you'll have to take a note about how it works a code one for me from scratch!

The script must have these payment methods : Paypal, BTC, Perfectmoney, moneybookers, payza.
The payment methods MUST be modular so I can delete add them.

I want to have FULL rights to the script.

If you can do this please contact me, I need this done asap!

aSmoo - October 15, 2013, 12:26 pm

I am still looking for someone who can do this guys.

MineSQL - October 15, 2013, 6:07 pm

Admin Panel
User Login
Subscriptions
ect.?

Please add all the features you are wanting to implement in a list (pm) and I will see if I can do everything. It will be done in a week if I accept. No bullshit.

Raz?r - October 15, 2013, 6:10 pm

PM me the details please and what features exactly you want.

It's going to be much simpler then that, at least I think so, there will be a couple of tricky stuff tho.

I'll PM you tomorrow so I can explain everything as needed.

I just feel pretty tired at the moment :(

Flowz - *October 16, 2013, 7:14 am*

I'm currently doing a job, but if I work hard I can have it finished in 2 days.

If you give a detailed version of what you want, I might want to hop in!

Transpose - *October 16, 2013, 12:07 pm*

You are offering a rather low price for the job you require.

Damdomy - *October 16, 2013, 1:09 pm*

1 Week?

300\$?

The features you need?

Good luck finding someone who can code it.

The price is way too low. I'd start at 600\$ minimum (if i were to do it).

Exactly. Especially because you want it from scratch.

MaskingMyUsername - *October 16, 2013, 1:41 pm*

Make it £200 (318 USD) and you have a deal.
