Thread: [Easier way to fix the broken layout problem.](#)

Kit-Kat - September 25, 2013, 7:01 pm

All you have to do is click the "Hack Forums" button at the top. That simple, it's because directly connecting to the DNS is glitchy, but even refreshing the page will fix it, you don't have to do any DNS changing or anything :)

Cryptic™ - September 25, 2013, 7:01 pm

Why not just press CTRL F5 when your on HF....

Kit-Kat - September 25, 2013, 7:05 pm

(Sep 25, 2013 07:01 PM)Cryptic™ Wrote: [\[CITE\]](#) Why not just press CTRL F5 when your on HF.... Because "CTRL F5" is only for Windows, because there's no CTRL button on the Mac, also because CTRL + F5 doesn't always work.

SIM-1179501 - September 25, 2013, 9:16 pm

The layout thing was happening to me and I just clicked my username link at the top and it fixed it.

Dr. Business - September 25, 2013, 11:34 pm

Whenever I click on 'User CP' it fixes it
Weird

Viral Dragon - September 26, 2013, 12:13 am

You know...that doesn't actually work. It might have worked for you but not for everyone. For example, myself. I've clicked just about every link mentioned here and in other thread, cleared cache, switched browsers, flushed dns, etc etc. Still broken for me with absolutely no CSS or images.

-Viral.

^

Sometimes it's an internal server error.

Only thing that's worked for me consistently is using the nsfw. version of the site. Why I don't know, perhaps it has something to do with what was previously cached in my browser. Maybe give that a try if you haven't yet. Otherwise it seems like it's just luck if some things work and some don't.

yo yo yo - September 26, 2013, 12:27 am

If I keep <http://hackforums.net> in a separate tab then the site loads fine for me. The Ctrl + F5 thing makes it bad again.

viva hackforum !

==

Not sure how this is relevant.

Like someone else said though, clicking on User CP fixed the issue.

Mommy???????????? - September 26, 2013, 12:31 am

Well, none of the shit mentioned in the thread worked for me..

I guess the only option now..
